**This book is about the future of humanity
which direction are we going?**

Preface

This book aims to help people in their lives and shine some light on our existence's meaning. And stop the arrogance of making people believe and advertise that we have all the answers in which is false and fake news and leads to be delusional, destructive, and narcissistic. How do you say we went to the moon, yet we do not have enough health care to handle a pandemic or even have enough testing for a virus? Are we fooling ourselves by being so arrogant? The facts about the coronavirus in 2020 tell us how vulnerable we are. The other matter is in science; we have not touched the surface of understanding the Universe or our planet. Always discoveries happen, confirming we do not have all the answers. However, there is truth in science that is timeless as in the three laws I give in this book in chapter 3: 1) we are unique, 2) there is an internal and external negative feedback loop; otherwise, the Universe becomes unstable 3) there can be only one God. So, why are we so arrogant and fall into this trap, and how going to the moon is so politicized misleading us. God has always been with us and communicated with us since Adam and Eve. The proof is the existence of the Bible way before science. God is the answer.

The book is tailored to Christian Meditation philosophy and culture. The world may not be ready for this book; it may be too much too soon. It is about giving some answers and report my findings. I am just a vehicle of bringing our Lord Jesus Christ's meditation to the world.

Ecclesiastes 3:1-8 (A.S.V.)

3 For everything there is a season, and a time for every [a]purpose under Heaven: ² a time to be born, and a time to die; a time to plant, and a time to pluck up that which is planted; ³ a time to kill, and a time to heal; a time to break down, and a time to build up; ⁴ a time to weep, and a time to laugh; a time to mourn, and a time to dance; ⁵ a time to cast away stones, and a time to gather stones together; a time to embrace, and a time to refrain from embracing; ⁶ a time to seek, and a time to lose; a time to keep, and a time to cast away; ⁷ a time to rend, and a time to sew; a time to keep silence, and a time to speak; ⁸ a time to love, and a time to hate; a time for war, and a time for peace.

And a time to live forever in peace.

Chapter 2 - Unsolved Problems	Page 31
Chapter 3 – Laws	Page 48
Chapter 4 - The Domino Effects	Page 81
Chapter 5 - Visualization and Music	Page 111
Chapter 6 - Praying with the left and right hemispheres of the brain	Page 118
Chapter 7 - Suffering and spreading the truth, discovering the truth, and living in an injustice world	Page 134
Final Words	Page 151

Chapter 1

Introduction

God's nature is to create; therefore, He will create, every second, a new start, a new planet, new trees and flowers, a new baby, etc. God loves to create and did everything out of love and because of love. There is a king for all of the creations in all universes. His name is Jesus Christ, the Son of the living God. Since Heaven is another universe or our Universe, God can choose whatever He pleases to put in it. It is His pleasure. When God creates something, it stays because He is God. He did not destroy Lucifer, the fallen angel He created with free will, but God can surely destroy Lucifer and said there would be time for that. Only God can destroy the body and soul see [Matthew 10:24-33](#). See [Matthew 13:24-29](#) and [Matthew 13:36-43](#) for the parable of the weeds:

The Parable of the Weeds

[24](#) Jesus told them another parable: "The kingdom of Heaven is like a man who sowed good seed in his field. [25](#) But while everyone was sleeping, his enemy came and sowed weeds among the wheat and went away. [26](#) When the wheat sprouted and formed heads, then the weeds also appeared.

[27](#) "The owner's servants came to him and said, 'Sir, didn't you sow good seed in your field? Where then did the weeds come from?'

[28](#) " 'An enemy did this,' he replied.

"The servants asked him, 'Do you want us to go and pull them up?'

[29](#) " 'No,' he answered, 'because while you are pulling the weeds, you may uproot the wheat with them. [30](#) Let both grow together until the harvest. At that time, I will tell the harvesters: First, collect the weeds and tie them in bundles to be burned; then gather the wheat and bring it into my barn.'"

The Parable of the Weeds Explained

[36](#) Then he left the crowd and went into the house. His disciples came to him and said, "Explain to us the parable of the weeds in the field."

[37](#) He answered, "The one who sowed the good seed is the Son of Man. [38](#) The field is the world, and the good seed stands for the people of the kingdom. The weeds are the people of the evil one, [39](#) and the enemy who sows them is the devil. The harvest is the end of the age, and the harvesters are angels.

[40](#) "As the weeds are pulled up and burned in the fire, so it will be at the end of the age. [41](#) The Son of Man will send out his angels, and they will weed out of his kingdom everything that causes sin and all who do evil. [42](#) They will throw them into the blazing furnace, where there will be weeping and

gnashing of teeth. [43](#) Then the righteous will shine like the sun in the kingdom of their Father. Whoever has ears, let them hear.

It means there are other planets like Earth that have creation. But the question is: did their Adam and Eve sin? The sin of Adam and Eve is they were disobedient to God and wanted to be God. This sin is in our genes and causes death. It does not make any sense we die, and the Universe is practically empty. There must be a resurrection and a time to occupy the Universe. So, are these creations in other planets sinless and possess the body in Jesus Christ? As far as we know, Christ said He has other flocks besides Earth creatures. Or maybe He means beside His followers on Earth.

John 10:16 New International Version

I have other sheep that are not of this sheep pen. I must bring them also. They too will listen to my voice, and there shall be one flock and one shepherd.

Part of the reason logically, there cannot be multiple Gods is the conflict of feedback from God to His creation, so there has to be only one God. So, he punished Adam and Eve and

told them that it is a forbidden fruit to want to be God, and they were disobedient.

The Bible cannot be written any other way. It says the surest way to Heaven is to get baptized and become a member of the club, and plant the good seed of the wheat, and get rid of the original severe sin of Adam and Eve that cause death. Because Adam and Eve's desire to be God would cause real instability in the Universe, it is a requirement. It is understood that having a conflict of feedback in the universe from multiple Gods would cause instability in the Universe. History shows this sin has repeatedly been happening, causing punishment from God. For example: at the time of Moses, Pharaoh thought he was God, and God punished severely with plagues and freed His people, the Jews. There are many other examples in history. Hitler was one of those people who thought his race was superior to all humanity and thought he was like God. Most likely, all the victims went to Heaven because it was a war from God against Hitler using God's people. Titanic's creator said April 15, 1912: 'God Himself Could Not Sink This Ship.' He thought he was God and God acted. President Donald Trump won the 2016 election with foreign influence in the United States; he

believed he was a superior leader and can do anything he wants. He thought he was above the law¹ and kept lying; he was a bully and con artist. He conned the voters by saying he will make America great again, and America was never great in its history, and it depends on which people you are talking to.

Isn't Hitler wanted to make Germany great, and Mussolini wanted to make Italy great, and the result was a disaster. He conned the evangelical church voters by saying he is born again Christian, and he is against abortion. Now the Christians say Trump is immoral. He says he believes in God, but there is no communication with God since he keeps lying, and his action is far from it. Trump and his follower think Trump is a Christ-like figure that came to save the country and the world, so they worship him. During the pandemic, Trump said to the governors he would not call them or help them unless they thank him and praise him for his beautiful job. It is false; he was not doing a good job; he wants them to worship him. On August 9, 2020, the White

¹. On July 9, 2020, the supreme court ruled the president is not above the law. A win for democracy and God.

House wanted to put Trump's face on Mount Rushmore; they still adore him. Enough BS that is what I say; what an ego?

[New York Times: White House reached out to the South Dakota governor about adding Trump to Mount Rushmore.](https://www.cnn.com/2020/08/09/politics/mount-rushmore-trump-south-dakota/index.html)

<https://www.cnn.com/2020/08/09/politics/mount-rushmore-trump-south-dakota/index.html>

Trump won the 2016 election with many conspiracies and false advertisements. He was a cult leader to his followers. During the pandemic, he does not care how many people die from the coronavirus or the plague and take pleasure in people suffering, especially in the blue state, his political opponent. Trump had no interest in saving lives. He said it is not my responsibility, and he lived up to it. Trump wants to open the economy and schools despite the country's virus's spikes. All he cares about is to be reelected at the expense of death to the people. He is like Nero² using fire to clamp

² Commentary by psychiatrist Dr. Lance Dodes² on MSNBC on July 7, 2020, at 7:10 pm Pacific time said: Trump is a true sociopath, or in a common language, his is evil. On July 16 at 7:30 pm on MSNBC, Dr. Dodes said Trump exercise satanism, in which Trump has pleasure from

down on the growing influence of Christians in Rome. Nero³ took pleasure in the suffering of people in Rome's fire in the year 64. N.B.C. News web reference March 9, 2020 death toll in the U.S. was 26 and 704 infected cases:

Critics compare Trump meme during coronavirus crisis to Nero fiddling while Rome burned

<https://abcnews.go.com/Politics/trump-shares-twitter-meme-fiddling-critics-compare-nero/story?id=69488386>

It is now August 7, 2020, not March 9, and it is a very accurate 164,094 deaths and 5,095,524 cases in six months, and Trump is still playing with death and the violin and not even mentioning the dead and advertise everything is going perfectly and wants to reopen the schools. Trump has a history of not caring. For example, Trump says he did not ask Putin about suspected bounties to kill U.S. Troops in Afghanistan. Amid no new signs of investigative developments, the president also noted for the first time that he would have acted had he known about an earlier C.I.A.

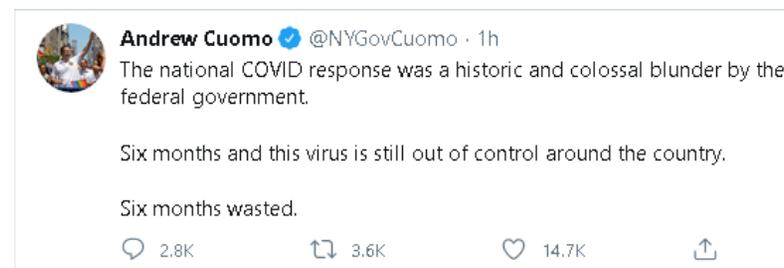

other people sufferings and does not care how many people die from the coronavirus and call him a psychopath.

³ The number of the beast 666 was [Preterist](#) theologians typically support the interpretation that 666 is the numerical equivalent of the name and title [Nero Caesar](#)

assessment. Trump has no empathy, and you cannot lead a country you do not love. The fact is the economy is teetering onto a depression. On July 31, 2020, the U.S. economy posted its worst drop on record.

<https://www.cnn.com/2020/07/30/economy/us-economy-2020-second-quarter/index.html>

On August 3, 2020, Governor of New York Andrew Cuomo said Trump and the federal government's response to the coronavirus is the worst blunder in modern history.

On August 4, 2020, the U.S.'s death toll was 156,000 dead, and President Trump said it is under control and "It is what it is." It is unbelievable to say that the virus is out of control about the dead and the truth. He also said he did more for African Americans than anyone, including President Obama

and Congressman John Lewis. At this point, I believe he lost it; he is delusional.

Trump has no plan for better testing for the virus. The republicans in the senate about passing a bill on July 28, 2020, to help people not get evicted from their homes, saying to the public, let them eat cake. A saying showing insensitivity to or incomprehension of the realities of life for the unfortunate.

President Trump has torn America domestically and internationally. He is the most corrupt president in history.

Trump said he might not accept the 2020 election forecasting a civil war and saying the election would be rigged because of the mail-in voting with no proof. So, Trump is imposing voting suppression by ordering the U.S. postal service to slow down all mail delivery, including ballots. It will affect millions of people delivering their medications and paychecks; they would be messing with their lives. On August 13, 2020, Trump said he would not sign the relief bill for the coronavirus that includes funding the postal service later; he said he would, nobody knows. Congressman Bill Pascrell said we could not be polite to corruption.

Trump holds up coronavirus aid to block funding for mail-in voting

<https://www.reuters.com/article/us-health-coronavirus-usa-postal/trump-u-s-post-office-election-funds-stalling-coronavirus-relief-talks-idUSKCN2591PU>

What's going on with the post office? Here's what we know

<https://www.usatoday.com/story/news/politics/2020/08/13/us-postal-service-whats-going-post-office-what-we-know/3360565001/>

He finally admitted that the virus might worsen on July 21, 2020, and wearing a mask would protect against spreading the infection. He said wearing a mask is patriotic after he was against it all this time. At this point, it does not matter anymore; people's lives have been shattered. In July 2020, Trump sent federal troops to cities like Portland, Oregon, to fight crimes from the black lives matter, peaceful protests that do not exist. There have been some riots by opportunists but nothing the local police cannot handle. And it was reported that the riot inciters are white supremacy supporting Trump. Experts say the troops made things much worse. It was a political stunt to detour the public opinion from the

pandemic. Trump will lie, cheat, and kill to win the election in November, and he does not care about the constitution.

Democracy relies on truth, and there was no evidence of the truth from the white house. A president who believes in God can share responsibility with God and not carry all the burden and asks for God's help. But not Trump: he thinks he can do it all, even prescribing medications such as hydroxychloroquine, the antimalarial drug, for the coronavirus. The medicine shows it causes the death of the infected people with the coronavirus. He also said disinfectants, such as bleach, could be injected inside the human body to fight the coronavirus. On CNN News July 9, 2020, 6:00 pm P.T., they reported people selling toxic bleach to religious organizations and infected patients with the coronavirus died, the F.D.A. charged them. On July 28, 2020, Trump promoted fringe "Alien D.N.A." and praises "Demon Sperm," a doctor as respected who said diseases are caused by dreams of sex with demons, masks are unnecessary. Malaria drugs Hydroxychloroquine is a coronavirus cure. Complete science fiction right out of the medieval time full of superstitions and make-believe. Only

God can create sperm. Satan is a fallen angel and cannot create.

Trump failed to see what was going on in the rest of the world and act early. He called it a hoax by his opposition party. He also believed he could override the 50 states' governors even if it is against the constitution. His failure to contain the coronavirus because he wanted a political gain caused the deadliest in the world as of June 10, 2020. The news reported 115,112 deaths and 16% of the population unemployed. On June 11, 2020, the jobless unemployment claim was 44 million for 12 weeks total. By June 15, 2020, the reported death of Covid-19 is 119,000 more than the American died in WWI or 116,516 death. It is now July, and the infection and death curve has not flattened; it is still going up. While the curves in Europe, Australia, and Asia already flattened and the infection started simultaneously with the U.S., they had a lockdown as we did at about the same time. On July 13, 2020, the death was 138,787, one day before Trump ordered hospitals to report the death to H.H.S. instead of the C.D.C. It is evident Trump wants to hide the truth of how many people die before the election, and it is tragic, so it is a cover-up. When the infection started in the

blue states, Trump did not care because he is a republican and divided the country into blue and red states. So, he let the red states do whatever they want. It was the reason the curve did not flatten; the red stated curves started to go up. It is now July, and they have 50,000 infections a day.

<https://www.bbc.com/news/world-us-canada-52757150>

A study has estimated there may have been 36,000 fewer coronavirus-related deaths had the U.S. entered lockdown a week earlier in March. (That would be March 8, where Trump was playing Golf)

The Columbia University research also estimated that around 83% of deaths could have been avoided if measures had been taken two weeks earlier. It suggested that 54,000 fewer people would have died had cities begun locking down on March 1.

President Trump dismissed the report as a "political hit job."

The study, which has not been peer-reviewed yet, covers data up to May 3, at which point there had been just over 65,300 coronavirus-related deaths in the U.S.

Trump's cabinet, the white house, and some Republican senators, Republicans in Congress, and Republican governors were just as corrupt and thinks Trump is a demigod. Trump and some Republican governors have blood on their hands; they are murderers. Trump is a coward and a monster. I believe the pandemic is a punishment from God for allowing it because of all the world leaders. They think they are God or want to be God and want to hold on to power at any cost; based on Adam and Eve's sin, God punishes severely and commends death to a human. Again, all the victims go to Heaven because it is a war by God against those people. It was evident when Trump held a failed rally in Tulsa the day after Juneteenth, and there was a 4.5 rector scale earthquake in Oklahoma after the rally. Oklahoma is not a seismically prone country; this is too much of a coincidence. I learned from the Bible God can cause an earthquake, and nature can cause an earthquake. Thus, God made His presence. In any case, I remain independent.

On June 27, 2020, I heard God say to me, stay away from politics, do meditations. So, I remain independent as I have voted for Republicans and Democratic Presidents based on

the content of their character and my evaluation from hearing their voices. I developed this gift because I relied on all my life on hearing because of my reading disability. And I was right about my choices the presidents I voted for and that have won delivered some peace to the world. I always question when they say conservative or progressive. Conservative in what? And progressive in what? I did not vote for Trump; I figured him out long before running for president; he is a con artist. So, I do not follow a political party; I follow Jesus. Trump can con the voters, but he cannot con God. On August 6, 2020, at Cleveland, Ohio rally, he claims that his political opponent, Joe Biden, will hurt the Bible and hurt God if he is elected. Trump falsely says a practicing Catholic is "against God." That is how he cons the evangelical voters with no religious basis, while Joe Biden is a devout Catholic. Trumps' lies, cheat, blame, bully, and belittle and hurt God in the Bible, and I do not think Trump knows what is in the Bible. He is deceiving the people.

I searched images for Jesus on the internet using "visualize Jesus" as a word search in two search engines. I looked and prayed at all the pictures and arts of Jesus; this was around

early-May 2020, but toward the end of the picture's gallery, someone hacked the computer and put a pornographic picture in each search engine image. It was taken out the next day when they found it. This filth of repeated hacking was repeated on June 7, 2020, and then it was taken out, then again on June 12, 2020, and so forth. On October 18, 2020, I searched pictures for "visualize Jesus" on the MSN search engine, and toward the end, they had a picture of Trump, equating Trump with Jesus Christ. So, some hacker did that. On May 26, 2020, they reported hacking the computer and adding child pornography to Zoom meetings. It was a sick person, and I realized it is a war; immediately, I heard God say it is not your war.

Why people obsessed with being more famous than Jesus Christ. That will never happen. Jesus has been famous for the last 2020 years and on. For example, about John Lennon, a member of the Beatles, he said:

"Christianity will go," Lennon said, according to Cleave's article. "It will vanish and shrink. I needn't argue about that; I'm right, and I will be proved right. We're more popular than

Jesus now; I don't know which will go first—rock 'n' roll or Christianity.

Forty years ago, on 8 December 1980, the former Beatle John Lennon was shot dead as he returned to his home at the Dakota apartment building in New York.

The reality is Jesus is Alive and is famous forever. John Lennon is famous for his music temporarily and cannot save anyone. It is so stupid to compare fame to Jesus.

If you want to know the truth about the mafia or gangsters, you need to talk to one of the gangsters that defected; he said I am one of his bad guys. On August 13, 2020, we read

Michael Cohen offers a glimpse of upcoming Trump book

<https://www.cnn.com/2020/08/13/politics/michael-cohen-book-cover/index.html>

Bible reference revealing this sin:

John 8:44 English Standard Version (ESV)

⁴⁴ You are of your father, the devil, and your will is to do your father's desires. He was a murderer from the beginning and does not stand in the truth because there is no

truth in him. When he lies, he speaks out of his own character, for he is a liar and the father of lies.

Again, it is shown throughout history, including the biblical flood, God did not care how many people die; it was always to combat evil. In the event of war from God against an evil man or people, the victims go to Heaven.

Trump was desperate to win the elections in 2020; it caused too many conspiracy theories from Trump and his supporter. I had to stop listening to the news all together two months before the election. Trump asked his supporters on September 2, 2020 (MSNBC Reports) to vote twice in the election, which is illegal. These conspiracies included propaganda that the NIAID head, Dr. Fauci, started the coronavirus in China. False, no man can do that worldwide without God, allowing it to happen, especially the disease's evil spread. Dr. Fauci has no interest in killing masses of people; he is a scientist with high ethics with a verifiable record. He is to save lives and not destroy lives. Why do conspiracy theorists' film themselves refusing to wear face masks? It is scientifically unfound, and Dr. Fauci promotes wearing

masks. The white house promotes a conspiracy of herd immunity, which would estimate 2.1 million death; they do not care. Scare tactics saying the democrats are communists, which are false and unfounded. They say the democrat does not want people to go to Church and spread the gospel. It is a cognitive bias.

Trump denies collusion with Russia in the 2016 election, and the republicans now, on August 19, 2020, say Trump miss led the F.B.I. Mueller investigation report. Qanon the “big tent conspiracy theory” that falsely claims President Trump faces down a shadowy cabal of Democratic pedophiles. Qanon conspiracy theories are evil, and Trump embraced the organization. On August 21, 2020, on CNN, Vice President Mike Pence Echo Trump will be a miracle around the corner to heal the coronavirus. On Friday, Vice President Mike Pence dismissed the fringe Qanon conspiracy theory, whose followers President Donald Trump embraced and praised earlier this week. And many other conspiracies spread by the internet and republican FOX News Channel, the present means of spreading false information in the 21st century and always try to blame somebody. It is all evil tactics, and no doubt Trump divided the country, and no political party wants that; most people realize it. Many Republican senators and

representatives start to distance themselves from Trump, and some said they would not vote for Trump.

Consequently, God and truth won the war as expected. For believers, God already won. People know Trump is in charge and responsible for all this death. It is Trump with no doubt; it did not have to happen this way. On October 2, 2020, the news announced that Trump and his wife tested positive for COVID-19. He returned to the White House sick on October 5, 2020, and removed his mask for a photoshoot, irresponsible for infecting others. He is so stubborn and arrogant, thinking he can beat this virus. On October 13, 2020, he recovered the country's white house strategy in herd immunity, telling people they can recover from Covid-19 as Trump did. However, in some records, people got infected for the second time and died. WHO said herd immunity has never been used in a pandemic and is firmly against it.

Trump lost his re-election in November 2020 and fell from the 90th floor high rise, symbolically with repeated scandals every day, a massive and crushing defeat with an election not even close. The most embarrassing loss an

incumbent president has ever suffered. Trump historically never lost, which was the first time he lost, but he vowed to fight. He cannot acknowledge that his leadership led him to lose the election. He has never admitted defeat his whole life, and now he had to; that is God's work. Trump said in the 2016 election that he has always been successful; he has never been defeated. On December 20, 2020, we had: "Trump Is Losing His Mind." <https://www.msn.com/en-us/news/opinion/trump-is-losing-his-mind/ar-BB1c5sBK?li=BBorjTa> Despite the pandemic, about 150 million people voted almost half of the population: the most massive turn out in history. Seventy million people voted for Trump, believing in his lies and conspiracies. Unfortunately, when you tell these people the truth, they hang on to the conspiracies because they do not want to be wrong. God made Trump think he will win the election, as the election was not close and took a few days after November 3rd. Unfortunately, trump conned many people to vote for him, telling them the Democrats are socialists. He announced falsely asserts election fraud on Tuesday at 11:56 pm Pacific

Time, and prematurely he said he won the election with millions of uncounted votes.

Trump threatened to go all the way to the supreme court to stop counting to not account for the remaining black votes. Black voters were only 12% for Trump and were the cause for Trump's defeat. The truth is voting has stopped by November 3, 2020, but tallying those votes has not. I don't think the supreme court can stop the tallying, and voting is sacred. As tallying was going on, the gap widened. On Thursday, Trump spread disinformation of fraud in the election and evidence of illegal votes; it is a disgrace. Every state said there are no illegal votes. Vote counting took so long, several days, until it was confirmed that Trump lost. In my opinion, it took so long because God was bleeding Trump and had no mercy on him, a slow defeat, 90 hours after election polls closed. God told me on November 7, 2020, I win, and love wins. Trump may never accept the defeat because he is delusional. On November 8, 2020, he spread the conspiracies that the democrats counted dead people in the election, a very twisted mind, and a sick mind. Do we read in Mark 8:36 For what does it profit a man to gain

the whole world and lose his soul? Trump lost his soul because he cannot tell what is right from wrong, meaning he does not have a conscience anymore. He tweeted on November 7, 2020, that he won this election big. He continues to spread conspiracy theory saying the election was stolen from him. Mary Trump, Trump's Niece, said Trump is humiliating himself. Trump is not a normal person; he is an overgrown child and will not concede. The fact is America chose a leader that is Joe Biden, not a liar. After many unsuccessful lawsuits by Trump to overturn the election, Trump was removed from office after an insurrection attempt on Capitol Hill, incited by Trump's speech on Jan 6, 2021. Electoral College makes it official, and congress and senate confirmed the result on Jan 6, 2021: Biden won; Trump lost.

<https://apnews.com/article/joe-biden-270-electoral-college-vote-d429ef97af2bf574d16463384dc7cc1e>

On January 20, 2021, he will be indicted. Trump faces civil and criminal lawsuits that will put him in financial ruin. In God's wisdom, God let go and shook His head floor by floor until the 90th floor until He ran out of patience. Trump was an embarrassment to the world,

just like Hitler. Unfortunately, 294,581 died by COVID-19 by December 9th, 2020; hopefully, they are all in Heaven. It was higher than the 104,404 troops killed in every war since the Korean War in 1950 combined. It has killed more Americans than the 1968 pandemic of 100,000 lives with the Hong Kong flu. And more than World War I of 116,516 American death and World War II of 291,557 American death.

When I say a club member when baptized, I cannot use the statement "a member of the Christian religion" since Christianity is not a religion; it is a relationship and a way of life. Meaning believing in Christ is all you need, plus communicating with God. There are no steps to get to God or Heaven, as some religions do. Get baptized and be redeemed by Christ. For example, if you are Muslim, you can get baptized Christian and stay Muslim. That should work. I would like to believe that God will judge what you have and not what you do not have. The only way to make sure is to get baptized. On the other hand, that is not an easy question to answer, "Who will get to heaven and who will not?" If we know the answer to this question, we all get to Heaven or the other Universe.

Some people think that science will keep ongoing and will be God someday. It is back to Adam and Eve's original sin. That will never happen. Science will go far enough to realize we cannot be God. The only way for our evolutionary existence is by communicating with Jesus Christ, the peaceful mediator, and agent. We are always going to need God's feedback and cannot do it alone. Jesus will always give us feedback through meditations and prayers. The voice inside that tells what is right is from God. In my first recommended deep meditation, I pray for Jesus to possess my soul; thus, the voice from within in all meditation or prayers is the voice of Jesus. Jesus was God made Flesh when He came on Earth, but when He resurrected is just God. So, it is essential in the meditation to view Jesus as God. Mathematics, physics, and science are true, and Jesus is the truth; therefore, Jesus will always give us mathematical and scientific feedback. The physics is understood through prayers and conversing with Jesus. The progression of all art and science hinges on this statement. This statement is not proprietary to the believer; if it is hard for you to believe Jesus is God, then all you need to think is there is an element of truth in the Universe and is done through Jesus. Jesus

came for the world, not just for the Christians but for the whole world. In the 21st century, going to Mars is that I do not think God will give us another planet after what we did to Earth. We need to fix our planet before we go to another planet. And the task is immense, and communication with God is essential.

John 14:6 New International Version (N.I.V.)

⁶ Jesus answered, "I am the way and the truth and the life. No one comes to the Father except through me.

Chapter 2

Unsolved Problems

Now the large deflection problem of beams and plates is solved by Farid A. Chouery, and the bow and arrow problems are solved after solving the Euler-Bernoulli equation that has not been solved in 270 years. Ever since primitive man invented the bow and arrow, they tried to perfect it. We can also predict the deflection of the fishing pole's behavior, but how about the dynamic problem? There are more problems to be solved after this solution. We only have scratched the surface. We have a new law of physics by Farid Chouery, "To every load or weight, there is a unique deflection curve," presenting: we live in a unique universe. God created everything special and love it, and all behave uniquely. When we press on something, the curvature is unique. We should find beauty in everything and feel privileged to live in this Universe. Also, we know that upon load contact with a surface, there is a contact shear proven from strain energy by Farid A. Chouery, so materials behave in a way like liquids adding more complexity to the deflections, and material behavior shows everything is

connected. Also, the new findings of arching in materials changed our perspective of loading on beams. These new findings open the gates to years of research. It may take several hundred years. Some unsolved problems in my field are as follows: System optimization with beam arching and shell arching. The solution of contact shear in 3D has not been solved, and it is important. The general solution math formulation of ultimate and linear buckling of plates and shells has not been solved. The large deflection of shells has not been solved mathematically. The large inelastic deflection of beams, plates, and shells has not been solved. Arching of plates and shells related to buckling effect. Arches of materials in beams, plates, shells, and solid have not been formulated, such as steel I beam. Finite-Element does not have curves; only lines are permitted. The solution is not accurate; for example, if we assume a circle as a polygon, this assumption is made when analyzing the stress under a bolt washer. I discovered the plates' deflection in the plate solution is unique and came up with the universal law: to every load or weight, there is a unique deflection. I gave solutions as an example and an elliptical plate. One can easily compare with finite elements to the exact solution and

see the ambiguity. Also, 3D finite elements with inclusions such as circular reinforcements in concrete are mind-boggling; how do I believe the output. Soils are full of problems that have not been explained mathematically and physically. Fire or flame has not been explained physically. If we can, then we can solve the energy problem. Slip surfaces for k_a , k_p , and k_0 in 3D has not been solved. Walls with friction with different topography have not been solved in 2D or 3D. Slope stability using variation calculus in 3D has not been solved. Boundary value problem with curves: finite element gives incorrect frequencies in dynamics in shells with curved reactions. In physics, the Schrödinger equation was only solved exactly for Hydrogen. So, I was thinking about it when Jesus told me in my meditation, "You don't have to solve the Schrödinger equation." On June 21, 2020, I told Jesus why I am dreaming about it in my meditation. He answered that I want someone else to do it and visualize me and give the answer. In psychology: visualization, antiviruses, and placebo are still in their infancy; when will man be able to self-heal by God? God is the author of all healings. Why is it too hard? Biology, Christ's living water is the anti-germ and antivirus? During

the early apostles, Saint Paul was bitten by a snake, and he survived. It was evidence of living water in his body. Saint John was poisoned with no success, and they had him exiled on the island of Patmos. Probably all the apostles had living water. Most people could not read; it was all visual and hearing God's word. I believe I was infected by the coronavirus in early April 2020, had a temperature the day before, and felt the illness in my lungs. I was healed in twenty minutes, and I was 69 years old and taking medicine for high blood pressure. I visualized living water going through my lungs and Jesus' hand on my chest for 20 minutes, and the infection from the virus was gone. It was not the first time I was healed by living water. My parents have a history of heart disease and died early from it. I continued to visualize Jesus's hand on my heart for years. On September 2nd, 2020, I heard a preacher on the news spreading a conspiracy. He was saying democrats do not want you to go to church or spread the gospel. I sat on the couch, trying to refute this conspiracy, and I passed out. I went to the doctor and had many tests. Finally, I had an angiogram, and the doctor said my heart is good and did not need to have a stent. I realize it is Jesus who is taking care of

my heart. My counselor asked me if I have an internal feeling that I cannot put a word to it. I said yes, and I call it living water. Jesus wants to give other people living water as He gave it to me. I will try to prove living water in the laboratory in my research study in clinical psychology. However, that does not prove the existence of God. It proves that we can use God, and there is feedback in the Universe that promotes health, healing, and peace. No matter how the intellect convinces us, God exists, we use faith, but we need both. In the sermon of the mount, Jesus said that people with a pure heart should see God, and I did. In my meditation in early May 2020, Mother Mary confirmed and told me I have a pure heart. Thus, I am a qualified apostle. On August 7, 2020, I did my music therapy meditation, and I heard God saying to me in Arabic. I want to be partnering with you. You may have heard of some hypocrites who call the Bible fake news, then how does one account for living water in the body? We do not need any proof; it is just faith. Also, a research study in Christianity has not been done as outlined in my dissertation GOD IS A MATTER OF SCIENCE AND PSYCHOLOGY NOT JUST FAITH

<http://www.livingwater3t2m.com/>

There is no unsolved problem that is not important, and money should not be in the way. These were some of the unsolved problems in my field. There are unsolved problems in every field, and the reader is to find them and attempt to solve them. The reader is encouraged to visualize Jesus in meditation and work with Him to solve the problems. In recent years there was a problem with lies from the White House and fake news from some media, and social media from other countries have infiltrated the world with a misleading view on the coronavirus in 2020. It is an external evil view that causes instability; it is time to resume God's internal feedback and listen to the truth. Hacking and false information altered the reality in our modern time, and God gave us a way to verify using meditation. Question anyone advertising the Bible, science, and history is fake news. For example, data on the coronavirus infection and death is not fake news. Before July 14, 2020, where the white house attempts a cover-up, it is being verified by may even worldwide before reporting, use your common sense. One way to do that besides reading the Bible is Christian Meditations and visualizing Jesus. To give an example of the existing solved and unsolved problems, I went to the

University of Washington Book Store to look for engineering support books and codes; there were three shelves of books to buy.

Then, I went to look for math books; there were three isles back-to-back bookshelves of mathematics subjects. It spoke to me about the oldest subject, "Mathematics." A history of work dated human existence. Still, there is a lot of unsolved problems in mathematics. When I took numerical analysis in graduate school, a solution of the Exponential Taylor series with matrices resembles the exponential series. The professor said you could see this has some truth but has not been proven. Then he said, "when this approximation will ever be proven." When will the computer solve mathematics algebraically, not just numerically?

Similarly, the computer will design system components such as an electronic circuit or mechanical parts, or chemical ingredients. Again, not just numerically but system components such as the human brain. Artificial Intelligence (A.I.) can spot animals in a landscape or scenery; why not spot cracks in concrete such as dams or bridges and help inspection. I discussed this needed solution with two

Microsoft employees on January 18, 2020. Besides, finding rust in steel structures such as bridges and help bridge inspection using A.I. would be very desirable. My second law of physics leads us to investigate systems in all aspects. The system department in all universities should expand to political systems, medical systems, and others, not electronics and mechanical. The amount of work for advancement in art and science in all fields is unimaginable. Check this link

https://en.wikipedia.org/wiki/Lists_of_unsolved_problems

There is nowhere in the Bible that speaks of visualizing God or Jesus, but does the Bible speaks against it? The question is not that visualization is not in the Bible, but is there any problem with it? Of course, it is natural to visualize and part of the human dimension as in daydreaming. All parables by Jesus require visualizations and meditations. I am sure St Paul has visualized the appearance of Jesus that he had throughout his life as I do.

Nevertheless, if visualization is in question, God already sent another apostle 2000 years after Christ to clarify this issue, and that would be me. It is essential to encourage people to

pray with all their minds and strengths as science teaches us how the brain works 2000 years later. From the Web, we read

https://www.cwgministries.org/blogs/bible_visualization_imagination What Does the Bible Teach about Visualization?

Submitted by Mark Virkler on February 20, 2012 - 09:32

Question: A ministry I was learning from says that you are teaching visualization, which is not scriptural. What is your response to this? Mary

Answer: Thank you for your question, Mary. What we teach is that if man chooses what he wants to picture and visualizes that, then that is wrong. If God grants you a dream or a vision, or Jesus paints a parable, or the Bible tells a story, it is not wrong to picture these things.

We define "Godly Imagination" as picturing things the Bible says are true.

In general, I am quoting from my book "Visualize Jesus: Ten Ways to Christian Meditation."

In a way, when you visualize God, you are asking for his presence - similar to calling upon his name. So, His third commandment applies: "You shall not take the name of the Lord your God in vain." Likewise, you shall not

visualize God in vain. God created us a free spirit, it is silly to control what people imagine, and you hypocrites, it cannot be done. When you visualize God or any of the Trinity parts, do not do it in vain. Visualize your day with Jesus. Meditation and visualization are to start in childhood. When I was seven years old, Jesus appeared to me, and I did not stop visualizing Him all my life; that is my right. If visualization is not in the scriptures, ask the Pope or the Bishop of whatever denomination you are or use your mind to discern. The Bible is not made to bind us; it is made to set us free.

It takes three disciplines, Clinical Psychology, Engineering, and a Minister or pastor, to design deep meditation. Some of these disciplines flourished 2000 years after Christ, such as Engineering and Psychology. That is why it is time, as God called time in my meditation. It is time to change your genes with Jesus. Note: God did not say it is time for the second coming of Jesus. God said that it is time to meditate for the preparation of Jesus' second coming. God's feedback is proper and is always on time. In His wisdom, God always gives people time to reconcile with Him before the second coming of His Son, Jesus Christ. Because if Jesus comes

back, it is over. On December 1, 2020, I asked God isn't spreading Christian meditation is the Job of the Church? He said, no, it is your Job. Historically, the deacons spread the Gospel, starting with Deacon Saint Stephen, the martyr (c. AD 5 – c. AD 34). The priest and pastors do not interact with the public as the deacons. For example, of God's message to the world, on Sunday, December 12, 2020, God told me in my meditation as He was speaking to all religions, "I declare peace."

John 10:27-28²⁷ My sheep hear my voice, and I know them, and they follow me: ²⁸ And I give unto them eternal life, and they shall never perish, neither shall any man pluck them out of my hand.

Hearing Jesus's voice is exactly what happens in Christian meditation. Visualizing Jesus and hearing his voice prepares you for the future and doing God's will; it is not about altering reality. It is about visually praying, so God would answer the prayers. Visualization is a way we prepare ourselves before taking action. There is nothing unbiblical about the tendency for humans to visualize in this way. It is wise to consider outcomes before taking action (Luke 14:28). However, modern self-

help gurus often promote visualization as a means to alter reality and get what you want. That is not true; we are not God. In the New Testament, we are told that Jesus is the Image of the invisible God, and we are to "fix our eyes upon Him" (Heb. 12:1,2). David was clearly visualizing the Lord at his right hand (Ps. 16:8; Acts 2:25). So, in both the Old and New Testaments, God has ordained imagery as part of our approach to Him. This book's message is we can only be sheep; we cannot be shepherd because we cannot be God. We always need His feedback, no matter how you look at it.

Quoting, Robert j. Sternberg and Diane F. Halpern's last paragraph in their book from their 2nd edition book © 2007, 2020 on "Critical Thinking in Psychology."

"... What is for sure is that the world now has more need for critical thinkers than perhaps at any time in the past. Never before have the stakes included the possible destruction of the entire world as we know it. This would be an excellent time to start emphasizing critical thinking, consequences in our teaching, and in our lives,"

Critical thinking requires analyzing information from the external world and needing God's feedback in the inner world using meditations.

So, what does it mean to be a sheep? It means receiving feedback from the shepherd.

Toward the middle of August 2019, Jesus asked me in my meditation to compose a deep healing meditation. I think Jesus knew a pandemic is about to happen. I could not sleep that night, worried about how I am going to do that. Then, I composed a song a healing song with the angels' help and called it "Jesus Healing Song." On the following Sunday, I was in Church. The bible reading was according to the Gospel; Jesus was teaching in the temple on the Sabbath. A woman was there who had been crippled by a spirit for eighteen years. She was bent over and could not straighten up at all. When Jesus saw her, he called her forward and said to her:

"Woman, you are set free from your infirmity."
Then He put his hands on her, and immediately she straightened up and praised God. During the reading, I was pulled back in history or in time, and I was there in the

synagogue standing and witnessing the miracle, and it was real, and Jesus was holy. I was astonished by how Jesus confirmed my song and encouraged me. I put together the meditation script around mid-September 2019 and met with Pastor Erik Wilson Weiberg later, and he recommended a few changes to the writing and designed the introduction. Well, the time elapsed, and the coronavirus came, and I could not do the recording. So, I published a PDF version on April 9, 2020, and updated it on September 4, 2020, on livingwater3t2m.com.

Why God calls time for meditation: look around; you see chaos worldwide for misleading information and the desperate need for God's internal feedback. Our democracy is at stake as countries like China and others switch to computer algorithms and surveillance to control the population. Switching for every citizen will receive a Social Credit Score. This score not only measures financial creditworthiness, as the FICO credit risk score in the U.S. does. It also calculates a person's social trustworthiness, political compliance, and interpersonal relationships, using hundreds of millions of surveillance cameras, digital footprints, and every possible data source. Crossing the street

at a red light means losing points; visiting one's elderly parents increases them. Those with high scores are rewarded perks, as in a frequent-flyer program, while those with low scores are punished.

With a low social credit score, one may be able to visit the best schools. Even one's social circle's impact: friends with low scores can pull down one's score. Social surveillance is nothing new, but this technology can scale it up to levels never seen before. Its goal is to improve people's moral behavior, eliminate corruption, and create a culture of "sincerity" and "harmony." Surveys indicate that most Chinese citizens are in favor of this system, particularly those with higher education. Many believe that it provides a real alternative to democracy, fostering morality, harmony, and economic growth. It is a system design against democracy and God, the creator who wants us to have free will. The people of China will be living to score points to gain favor from the government. God wants us to be His and gain His acceptance. So, now God is competing or waging war against China as they replace God with the government. They are making the government God. So, you know who is going to win.

Visualizing Jesus causes an abrupt change and causes evolution in the human body and the brain by solving the unsolved problems and resolving fear and worries. Thus, development is always disrupted by an abrupt change. Visualization with Jesus requires having an experience with the divine and cause physiological change. Visualization without experience is like thirst without water. Every meditation is unique because God changes them to make you the astronomer of the inner space, and it is a mystery. So instead of outer space, it is exploring inner space. Thus, the external and the internal are unique, and God gave us a beautiful tapestry to live. Music therapy meditation conditions the brain to experience God's presence. The second law of physics by Farid A. Chouery shows the Universe cannot function without God; otherwise, it becomes unstable full of chaos. From science, there can be only one God; otherwise, we have a conflict of feedbacks. I solved many unsolved problems by discussing them with Jesus. Mathematics is truth, and Jesus spoke to me in mathematics and counseling. Jesus was a carpenter and was proficient in math. He is truth, and Math is Truth.

Finally, other unsolved problems are not necessary to deal with science, such as poverty or homelessness, racism, and social injustice. Also, the issue of greed, we have giant corporations' business models to profit at all costs, even at the expense of destroying civilization. These problems have always been with us. I do not know if there is a mathematical equation to solve these problems other than education, medicine, food distribution, and medications. We need a breakthrough in our economy. It is dealing with who we elect in office. A profound meditation with Christ allows us to find His consent about who we vote for and illuminate greed. The Christian religion has been under attack by the devil throughout history, causing it to have division. We need to pray for the union of all denominations with their differences. There have been differences from the beginning throughout history, and still, the early Church was one Church. We need to do the same. The web on the computer facilitates the distribution of information and allow our conscience to do something. We cannot say we were not aware and rely on our ignorance. Jesus asks us to take care of the poor, the sick, and visit the prisoners. His solution is to

tithe and use our time for His request. Jesus requests a moment of our time.

The meditative solution can be Christian Meditation, and it is not to have only one meditation to fix all, as in Mindful Meditation attempts.

When you reach the point that there is no fault in the Universe and not reject it, you become one with the Universe.

Chapter 3

Laws

Everything is unique and loved; we should not see the ugly in people, and we should find beauty in them if God loves them. God gave us a beautiful tapestry to live in.

The rocks in the mountain erode, so even that is dynamic.

Everything is unique, has meaning, and is loved by God. Since everything is dynamically unique, the Universe is alive and has a heartbeat.

<http://www.facsystems.com/Law.pdf>

FIRST LAW OF PHYSICS⁴

By Farid A. Chouery, PE, SE

We have a new law of physics by Farid Chouery

"To every load or weight, there is a unique deflection curve."

⁴ This law was discovered in 2007 while working on a Structural Plate deflection solution by Farid A. Chouery.

Presenting: we live in a unique universe,

God created everything special, and all behave uniquely. When we press on something, the curvature is unique. We should find beauty in everything and feel privileged to live in this Universe.

What is the meaning of a unique deflection curve?

In structural engineering, everything we do is a philosophy except deflection. Deflection is real and is not a philosophy; everyone can see deflections and curvatures caused by a load or weight applied to the material; unless you are blind, but you can always feel deflection curves.

In mechanics, one can easily find no two sets of loads that give the same deflection curve. For example, one can clone a D.N.A. for sheep, but the behavior would not be the same. Thus, they possess a different soul and spirit. It is like identical twins; they have a different soul and spirit. You may look at a bouquet and say they are all the same roses, but they are not each with a different curvature. No matter how you express the deflection curve mathematically for the same load, the curvature would be the same because it is unique, bringing us to a unique universe. How about our

existence? It can be quickly concluded that we are all unique and should not have low self-esteem but too high self-worth. There are none alike; we are too valuable to ourselves and each other. Galileo showed the Earth is not the center of the Universe, and Man used to have great self-esteem, thinking we are in the center of the Universe. Self-esteem was taken away from us at that time, and now it is restored and will never be taken away from us. Now we say I am something I am dynamically unique since every minute, 30,000 cells change in my body. There is only one in the entire Universe.

How about replicating deflection curves in the Universe? If so, then these criteria must be met.

- 1- Topography must be the same as having the same gravity.
- 2- Gravity must be the same, or the mass composition below the beam must be identical.
- 3- Gravitation influence from the Universe from all stars and planets to the beam must be the same.
- 4- The temperature must be the same.
- 5- The exact location of the load on the beam must be in the same place.

- 6- The beam shape must be identical.
- 7- The beam span must be identical.
- 8- The beam composition must be identical.
- 9- The load's mass must be identical.
- 10- Beam Reactions must be in the same place.
- 11- Beam Slope must be identical
- 12- The atmospheric pressure must be identical
- 13- There should be no vibrations; the Universe has to stand still, no Super Nova effect, the wind has to stop blowing the tectonic plates has to stop moving, no volcanic activity, no cars moving, no breathing because of vibration presents different deflection in the vibration gradient in each beam. Even if it happens, gravity is not the same
- 14- The residual gravitational force from any star or planet must be the same.
- 15- Magnetic field to match.
- 16- Electric field to match.
- 17- Contact shear must be the same underneath loads and reactions.
- 18- Add your criterion

On item 18 above, I send my law to a physics friend of mine; his name is John Barclay in England; here is what he said:

"I think it is amazing is how profound concepts like general relativity are Pervasive, which I saw in your list (although not framed in terms of general relativistic language, these are the same universal physical laws!)"

So, one can easily conclude that it is impossible to replicate deflection curves in the Universe. From an engineering perspective, one can say they are close enough. From a philosophical perspective, they are not the same, and how about the deflection point distance when surveying a distance? That presents a problem because the measured distance will vary in two locations by the number of atoms at the tip. Having the same distance is not likely but probable in the Universe with a low probability number. It is also inconceivable to say the law of deflection does not apply to a different planet in this Universe. But I cannot do a laboratory experiment on every planet, so I have to have faith.

From this law of physics, we can conclude every human is unique in the entire Universe. But every minute, 30,000 to

40,000 skin cells change in the body, so we are not unique; we are dynamically unique. All life is dynamically unique.

One may call that the Universe is random. That is not possible because even at randomness, one could not get everything to be unique. That proves the existence of a creator that is so jealous of His work that He wants everything to be unique, and it appears the uniqueness is deliberate. It means that God has a database that can tell the number of hairs on your head and has His Hand on everything. Some people say that the Universe is unique is a given, but now we have proof to confirm our intuition.

I do not think there will be a time where humans would say I understand what is happening in the Universe. What the bleep do we know?

Three conclusions we can observe from the current Universe:

- 1- We must live forever and have a new body to occupy the Universe.
- 2- God must be with us physically to tell us what to do.

- 3- Only trusted people can occupy the Universe – The instability hypothesis: instability always happens from small things.

It does not take much explaining to conclude that we need an immortal body and that our present body has limitations, is mortal, and cannot occupy the Universe indefinitely.

A simple example of our weakness to occupy the Universe without God's help is imagining Earth's weather. With all our technology, computers, and the history of scientists' work past and present, we still cannot tell the weather correctly. How can we know the weather of every existing and yet to a new planet in the Universe? That is not possible, especially when we also start asking about the composition of the planets and the dynamic changes that are continually happening. We need God's help! As it says in Mark 10:27: Jesus looked at them (the disciples) and said, "For mortals it is impossible, but not for God; for God, all things are possible." There are many other impossible concepts to ask about, such as learning every language on Earth or possess all knowledge on Earth? These are impossibilities due to being mortal, as we do not have enough time to learn

everything and our memory also decays, resulting in the loss of memory over time.

In a nutshell, it seems that to occupy the Universe and the new Earth indefinitely with our present or future body and mind, we must believe in God. We are infinitesimal; how can we occupy the Universe indefinitely without God? There is nowhere else where we can obtain the required feedback or communication to exist in the Universe. Maybe that is why Christ said that to enter the kingdom of Heaven, we must believe in Him or God since He is God and saved (John 11:25) (John 3:16). From this research, it will be apparent that we can obtain God's feedback through Christian meditation during the limited time we have on Earth. In the new body given by Jesus Christ, the Bible refers to the fact that, in Heaven, we will see clearly (1 Corinthians 13:12), but we will not know everything. In Heaven, we will serve God (Revelation 7:15). The service is not passive but active. It involves fulfilling responsibilities, carrying out duties, expending effort, and having the energy and creativity to work well. It will

be work with lasting accomplishment, unhindered by decay and fatigue, and enhanced by unlimited resources. It will be like the work Adam and Eve did in the Garden of Eden (Genesis 2:15) before sin brought the curse on the ground, with its thorns (Genesis 3:17-19). It is suggested that traveling through space will not take any time, since we will travel in the fifth and sixth dimensions, like Jesus entering a room with closed doors (John 20:19).

<https://www.universetoday.com/48619/a-universe-of-10-dimensions/> It is clear that our new body will be immortal and have other senses and dimensions will be in constant communication with God because of the instability hypothesis. For these reasons, the Bible indicates that Heaven cannot be imagined but can be implied, and therefore things can make sense, even the long-standing question of "why is my life so short?". The answer is that Adam and Eve's sin put us in jail, and we cannot travel to places in the Universe. This sin can cause instability in the Universe as it did on Earth, shown with all the past wars because of arrogance and wanting to be God.

Note: The current Universe has a problem with the second law of thermodynamics. It notes that every system—whether closed or open—at least *tends* to decay. The Universe itself is "running down," heading toward an ultimate "heat death." The Bible speaks of a new universe or new Heaven – see Revelation 21:1-6 (N.R.S.) – and the Universe is Heaven (see Deuteronomy 1:10 [ESV], Psalm 8:3-4 [ESV]).

Proof of unique deflection:

The Law: To every load, there is a unique deflection curve.

We will investigate a beam.

First, if one changes the beam composition or geometry to produce the same deflection curve, then the beams are already unique in materials. That is understood in the Universe to have a uniqueness in materials. It is possible to have a close enough behavior with two different compositions by making $P_1/EI_1 = P_2/EI_2$ in a beam with a point load at some distance from the reaction. But to match it identically, that would be impossible for lack of matching too many parameters such as gravity, vibration, location of

load, temperature, slope, shape, composition of materials, etc.

We will investigate two beams with a point load and try to match small deflection with the point load in a different location having the same composition.

Two beams of distance L with a point load in the center and the other at b distance.

Ref: American Institute of Steel Construction Manual (AISC) see Beam Diagram and Formulas Table

Deflection 1: $P_1 x(3L^2-4x^2)/48EI$
..... #7 AISC

Deflection 2: $P_2 b x (L^2 - b^2 - x^2)/6EIL$
..... #8 AISC

Where E.I. is the elastic modulus and moment of inertial, $x > b$ or $< L/2$ and P_1 and P_2 is a point load on each beam.

It must happen for every x. To match, make x cancels out by letting $P_1 = 2b P_2 /L$, then when cancel and solve for b, the result is b must be $L/2$. And thus, $P_1 = P_2$.

If the load is not at the center, the result is the same, and the solution is the loads, and the location will also be identical. You cannot have two sets of loads at a different place with the same deflection curve.

Now every load can be decomposed to point loads; thus, it is valid for any load. If it is not a beam or a mass of material with variation, it can be done with a free body diagram. A large deflection gives an identical solution. If the beam is inelastic or plastic, similar proof can be obtained following the incrementally elastic stress-strain curve. And the law is universally true.

https://en.wikipedia.org/wiki/Euler%E2%80%93Bernoulli_beam_theory

EVERYTHING IS UNIQUE AND LOVED BY GOD
(Genesis 1:1-31)

PRAISE GOD – read Psalm 139: 13-16 I will offer You my grateful heart, for I am Your unique creation, filled with wonder and awe. You have approached even the smallest details with excellence; Your works are wonderful; I carry this knowledge deep within my soul. – Psalm 139:14

Since everything God created is good, we should not reject any of it. We may receive it gladly, with thankful hearts. (1 Timothy 4:4)

All of us are unique and have something to contribute; we only need healthy competition and not destructive, full of bullying, hate, intimidation, humiliation, discrimination, and persecutions.

<http://www.facsystems.com/Law2.pdf>

SECOND LAW OF PHYSICS⁵

"To Every Complex System, it requires a

Mandatory (Positive) Negative Feedback Loop for Stability"

Recognized by most scientist

By Farid A. Chouery, PE, SE

First, we will discuss the instability hypothesis: instability always happens from small things.

What causes instability? You will find it is one thing or a choice of one of many possibilities. In general, it is a small part of the system that causes instability.

⁵ Topic is from "Visualize Jesus: Ten Ways to Christian Meditation" Book by Farid A. Chouery Copyright 2016

For the instability hypothesis, it is seen in all engineering subjects that the cause of instability is a small thing, not something big. For example, in an electric circuit, one burned or reduced value resistor or one burned transistor, causing instability in the output. The column instability happens by a load when exceeded by a small amount; the column is unstable or buckles. Also, the structural one bolt can cause instability, so they require redundancies. It has happened before in collapsed bridges causing the domino effect of one bad weld or a bad bolt. A chair or table becomes unstable if one leg is broken. In geotechnical, the landslide happens when a small added value of weight causes the safety factor to be reduced. Slides also occur from water when pore pressure increases. In computers, it does not take more than one bug in the program to crash the program. One bad chip or voltage spikes or transients, or heat can cause the computer to crash.

Whether or not the atmosphere has stability depends partially on the moisture content. In a car, all it takes for the vehicle to be unstable is one lousy sparkplug. Oxygen (one element) causes corrosion.

Instability in investment happens when a stock begins trading widely from highs to lows that are not within the normal range. In politics, extremist revolts start with one person. In political elections, one false propaganda about the candidate can cause a landslide in the election. One person can initiate wars. September 11, 2001, a terrorist attack by a few people in the United States caused worldwide instability. Bin Laden was one person that started a terrorist group. Corruption in India has a terrible impact on the economy and causes enormous social instability and riots. Local politics, tribalism, and religious division can cause instability. **It does not take a lot to cause instability.**

In psychology and medicine, one syndrome can cause instability, not many syndromes. What causes emotional instability? One of many things: a) overdependence on someone or something, b) suppression of feelings, c) human tendency to expect rather than accept, d) environment, e) one gene. One injury can cause physical instability. In any religion, all it takes is breaking one commandment to induce guilt and instability. In music, one note off-key or out of tune destroys the whole song or the musical piece. In

transportation, all it takes is one accident to cause a traffic jam. In food, one bacterium can cause instability in the stomach. If you eat a meal at a restaurant that serves terrible tasting food or got sick from the food, what are the odds you would go back and even think about it turns your stomach? What breaks a marriage: one affair? What makes a plant or a tree die: not enough water or sun?

Instability happens when someone hacks into your bank account and takes all your money, even when it is a small amount. Instability or panic occurs when the Bubonic Plague appears, 14 people had it in September 2015, so unrealistic fear becomes unstable. However, when someone got sick with the coronavirus in December 2019 in China, a world pandemic happened. It was confirmed on May 16, 2020, CNN news started likely from animals. On August 4, 2020, the World Health Organization (WHO) said Coronavirus did come from bats, say WHO scientists sent to Wuhan, <https://www.yahoo.com/news/coronavirus-bats-wuhan-world-health-organization-112507142.html>.

On July 5, 2020, some news said is from sewage when finding coronavirus in samples in March 2019, nine months before China, a Spanish virologist announced:

<https://www.yahoo.com/news/covid-19-may-not-originated-143843488.html>. Usually, flies transfer the virus from animals to humans, then how did it happen with the sewage. Also, it was reported on July 10, 2020, coronavirus was found in food. <https://www.yahoo.com/finance/news/china-points-shrimp-covid-19-081937694.html> This question is always under research. It is most likely that God allowed this virus to develop naturally because of the world's corruption and evil, as He did it before with the flood. However, China⁶ failed to tell the world of this severe virus disease in time. But just as past pandemics as the bubonic plague, the blaming game started. But the ultimate responsibility should be God, not China. Additionally, the political gain was delaying containment in the United States, causing the U.S. to have the most death and sickness in the world. It was one person who caused this pandemic. The whole world became at war against the virus; future wars will be against instability. All military must be

⁶ Some political leader tries to take advantage of the situation and advertise that China did it to start the virus in the laboratory to convey another world war with China. It is evil and from the devil. We need peace, not war regardless of you believe, haven't enough people died?

equipped for these future wars that caused many deaths, make us sick, and annulated us, including global warming. Wars nation against nations is not desirable and should be stopped. The main threat to humanity is enemies who cause instabilities. And as you see, there are many issues in instabilities. Jesus told me on January 7, 2021, “the war on instability is the real war.”

Also, breaking the law causes instability and fear; breaking one law will do it. Water Scarcity May Cause Global Instability, U.S. Intelligence Agencies Say in Report March 2012. The rise of sea level by 10 inches in 2010 (a small amount by comparison) and continue to rise even a slight increase can have devastating effects on coastal habitats and cause instabilities. Trace amounts of CO2 could cause political instability, severe drought, famine, ecosystem collapse, and other changes that make the Earth a decidedly inhospitable place to live. **So, what causes instabilities: small things, the straw that broke the camel's back.**

One can also realize that stabilizing a system is done through a negative feedback loop from control system engineering. **It is called a negative feedback loop because it reduces the**

input, but it is positive. For example, psychotherapy is considered a feedback loop to stabilize a patient. In medicine, medications, surgery, and blood tests are considered a feedback loop for healings. In systems, it takes something from the output and gives it back to the input to stabilize the system. Some simple systems do not require a feedback loop due to the necessary limit being small; these systems are elementary and not complex. So, every complex system must have an input definition, an output definition, and a mandatory negative feedback loop to stabilize the system see Figure 1.

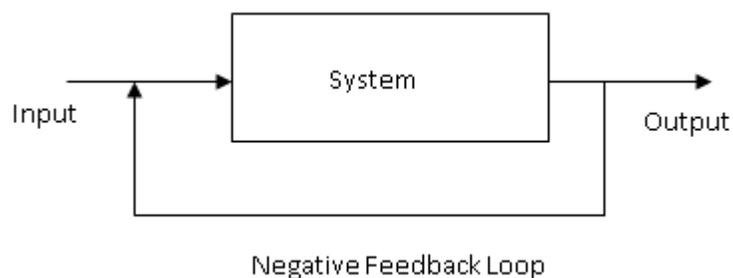

FIG. 1 - DEFINITION OF ANY COMPLEX SYSTEM

In an electric amplifier or the neurons in a human's brain (considered as an amplifier), if there is no feedback, it will

lead to distortions, and the amplifier or the brain are not doing their job.

Also, note too much feedback in an amplifier will not do its job to amplify with reasonable efficiency, or it becomes less efficient or worthless. When neurons in the brain get too much feedback or no feedback from too many psychoactive drugs or depressants, narcotics, alcohol, or hallucinogens, instability happens. So, in a system, the feedback must be a balance to give the best results. So, in any system, what is the right feedback or the proper feedback?

The Perceptual Control Theory led to the Method of Levels in which the therapist introduces the negative feedback loop. The therapist works with the patient to resolve conflicts by helping the patient shift their awareness to higher perception levels to allow reorganization to occur. I believe external negative feedback loops are not sufficient, and internal negative feedback loops through meditation will expedite the healing.

Another example: Kohlberg's theory for moral development has been tested for many years, with critic agrees with the

theory but complain there is no alternative. I find the theory is sound and makes sense. It is consistent with the laws of physics when we look at a system. The child's mind gets the input for the moral development from external sources, usually the parents and the environment. When the child grows up, they develop their morals from the internal source, as the output, making moral decisions by looking within themselves. The feedback to the system for good morals is peace of mind and having friends makes it a complete system.

Through Christian meditation, the negative feedback loop is Christ himself, a higher power, and that becomes a primary feedback loop to stabilize the human system. Thus, the voice from within that Input System Output Negative Feedback tells us right from wrong is remarkably from God. So, God's voice is our feedback. In my Christian meditation, I get daily feedback from visualizing Jesus and talking to Him, mostly Jesus working with my fears and worries or helping me to solve problems and do His will. However, a vision, an apparition, or a miracle message does not happen very often, only a few ones. This kind of feedback is rare because it will

cause a significant change in someone's life, and God knows that, as it did to me. So that means for the human system, there is a variety of feedbacks, not just one. **There exist in the Universe internal and external negative feedback loop for stability; otherwise, the Universe will become unstable.**

THIRD LAW OF PHYSICS

“Scientifically and Spiritually, There Can Be Only One God”

Recognized by many religions⁷

This law has to do with having scientifically no conflict of negative feedback to creation to avoid chaos, which stems from the first and second law, and spiritually, who can we trust and have faith knowing who will answer our prayers and be with us. There cannot be a clash with multiple gods in deciding our destiny or give us our daily feedback. It is

⁷ The broader definition of monotheism characterizes the traditions of [Bábism](#), the [Bahá'í Faith](#), [Balinese Hinduism](#), [Cao Dai \(Caodaism\)](#), [Cheondoism \(Cheondogyo\)](#), [Christianity](#),^[10] [Deism](#), [Druze faith](#),^[11] [Eckankar](#), [Hindu sects](#) such as [Shaivism](#) and [Vaishnavism](#), [Islam](#), [Judaism](#), [Mandaeism](#), [Rastafari](#), [Seicho no Ie](#), [Sikhism](#), [Tengrism \(Tangrism\)](#), [Tenrikyo \(Tenriism\)](#), [Yazidism](#), and [Zoroastrianism](#), and elements of pre-monotheistic thought are found in early [religions](#) such as [Ateism](#), [ancient Chinese religion](#), and [Yahwism](#).^{[11][12]} from <https://en.wikipedia.org/wiki/Monotheism>

understood that having a conflict of feedback in the universe from multiple Gods would cause instability in the Universe. Therefore, there is only one source of healthy or (positive) negative feedbacks.

In the old days, people had many Gods for every wish they made until the Jewish-Christian religion, Islamic religion, and others came and told people there is only one God. We read in John 20:17 that not everyone has a different God as follows:

Jesus said, "Do not hold on to me, for I have not yet ascended to the Father. Go instead to my brothers and tell them, 'I am ascending to my Father and your Father, to my God and your God.'"

About the Bible: The Bible is written by people that walked with God; they enlighten you about God. They did the best they can. So do not criticize the Bible; it is not fair and is wrong. The Bible has helped people as many as trillions of people throughout time. For 3000 years, whether the Old or New testament. If God exists, He would be tending His creation from the beginning, and the Bible is proof of His involvement. I do not like

(almost hate but not quite) people that use the Bible as a weapon to hurt people. The Bible is not made for that. The Bible has been manipulated, miss-understood, and twisted to make money, steal, and kill people, especially by tele-evangelical making money, when the TV was invented. Also, before the advent of media, false prophets were around throughout history.

Christ said in Matthew 7:15-23 (NIV)

True and False Prophets

15 Watch out for false prophets. They come to you in sheep's clothing, but inwardly they are ferocious wolves. 16 By their fruit, you will recognize them. Do people pick grapes from thornbushes or figs from thistles? 17 Likewise, every good tree bears good fruit, but a bad tree bears bad fruit. 18 A good tree cannot bear bad fruit, and a bad tree cannot bear good fruit. 19 Every tree that does not bear good fruit is cut down and thrown into the fire. 20 Thus, by their fruit, you will recognize them.

21 Not everyone who says to me, 'Lord, Lord,' will enter the kingdom of heaven, but only the one who does the will of my Father who is in heaven. 22 Many will say to me on that day, 'Lord, Lord, did we not prophesy in your name and in your name

drive out demons and, in your name, perform many miracles?' [23](#)
Then I will tell them plainly, 'I never knew you. Away from me, you evildoers!'

About God: God is simple. He is not complex and does not need feedback. He is mighty and holy and fully complete and must keep being simple so that all creation can approach Him. He does not change. He is the same yesterday, today, and forever. He told me in my meditation on April 29, 2020: I am the head, Jesus is in the heart, and the Holy Spirit is in the Gut (meaning the gut feelings where intuition and inspiration occurs or the gut-brain), and He said it is all one body. Thus, you cannot separate his three expressions or organs from each other they function as one God, and they cannot be separated, and they all exist from the beginning. They cannot function without each other. God wants His heart to be for everyone, and that is why Jesus came for the world or the cosmos. He is for everyone.

Jesus Christ proceeds from the Father; the Holy Spirit proceeds from the Father, not the Son. Because the Holy Spirit works with everyone, including non-Christians. I do

get living water feelings sometimes in the brain, sometimes in my heart, and sometimes in my guts.

Why do we have wars? We are taken away, something that could never be replaced. God has His Hands on everything. The Universe is made to be occupied; the Universe is not created, so it wants to be unoccupied.

Contact shear Poisson's ration material behaves like liquid changing our perceptions in loadings. Why is that important? One finds we cannot isolate material loads; they affect each other in all dimensions, and they are all connected.

There is a difference between Finite element and exact solutions; why is it essential to have the exact solution? Because we are never comfortable with approximations, the search for accurate physics has always been derived from precise mathematics. Repeating I previously said:

I do not think there will be a time where humans would say I think I understand what is happening in the environment of the Universe. What the bleep do we know?

To repeat three conclusions from above, we can observe from the current Universe:

- 1- We must live forever and have a new body to occupy the Universe.
- 2- God must be with us physically to tell us what to do.
- 3- Only trusted people can occupy the Universe – The instability hypothesis: instability always happen from small things.

Christianity will surpass all religions even though Christianity is not a religion; it is a way of life. The reason is the Holy Spirit will tell us what to do, and He is always with us. Scientifically and Spiritually, Christ's second coming is imminent.

Three things can happen Closed Universe versus open Universe versus standing still to infinite time. Both forces will not disappear. The endpoint is cyclic that means the Universe will stop expanding and contracting, so it will expand and contract in a small space, not extending all the way and not contracting all the way.

Why should God give us another planet? How can we be trusted? After what we have done to this planet and each other, we can do it on another planet if we can destroy ourselves on Earth. People think of the colonization of

planets in the future. Colonization is an act of hostility, the only way we can occupy this Universe if and only if we can be trusted and not cause instability.

The impossibility problem: the weather on every planet cannot be known for existing or yet to come planets. Try Earth; we are not there yet, maybe never. How about other planets? Is it possible? But God can communicate with us through meditations. In meditation, God may communicate visually and not necessarily with words. I recall the day I published my book on smashwords.com, price \$2.99 book title: “Visualize Jesus: Ten ways to Christian Meditation” Christ appeared with a white robe in my meditation and kiss me on my cheek. Note: Jesus did not take over my visualization during my visual conversation. He appeared. It is especially important in psychology what happens in life compare to what people perceive. On Monday, July 21, 2020, Jesus told me, when I gave you the money for school and research, you can change the book's price to free. So, I waited to discuss it with my counselor on July 23, 2020. I did my music therapy meditation before my appointment, and I heard God saying to me, this is my book, and it must have value. I realized Jesus and God must have discussed the

book. So now, even if I have millions of dollars, the book's price will not change. I was surprised God called the book my book, so I became humbled.

Man has control through meditation to alter what is perceived to walk on water and heal people. In my meditation book, the technique allows having an internal therapist, which is Jesus, to help the mentally ill and everybody. Using my approach, you can become a faith healer by exchanging living water. The only problem I have is the suffering in the world, and the people from the past suffering must stop, and there must be a resurrection. Jesus is with us forever in the bread and wine, but that does not mean there is no resurrection.

If the Bible says in the new life to come, we will know everything because if God exists physically with us, we can simply ask Him about the weather or anything.

Traveling in space and time, we need a new body, as promised by Christ. The current body is mortal, and temperature and radiations would evaporate in the cosmos. Bible verse Daniel 3:19-30 Christ was the fourth person, and the fire does not affect his body, and He caused the other

three believers to survive the fire. Also, Revelation 7:16, Never again will they hunger; never again will they thirst. The sun will not beat down on them,' nor any scorching heat. Revelation 21:4 - And God shall wipe away all tears from their eyes; and there shall be no more death, neither sorrow, nor crying, neither shall there be any more pain: for the former things are passed away. Jesus' appearance the act of traveling in the seventh dimension, and the ascension shows it Luke 24:31; Acts 1:1-11. Jesus is entering a closed-door room, John 20:19-20. Elijah Ascends to Heaven 2 King 2. ¹¹ Then it happened, as they continued and talked, that suddenly a chariot of fire *appeared* with horses of fire and separated the two of them. Elijah went up by a whirlwind into Heaven. We currently live in a transition to the next life to come. We believe God is happy with His creation and love it, and will provide a renewed creation using the old. He will make things anew. The inter-dimensional space-time portal is the dimension we travel in without the time dimension.

Roswell U.F.O. is portrait as a hoax or from the earth devil; my reason is it is on the birthday of Isis where the star Sirius was the embodiment of Isis, the chief God of the pharos,

while the God of Israel swallowed the God of the pharos. Christ's body that will be our eternal body does not look like these U.F.O. bodies from Roswell. It was a false prediction by the evolutionary theorist that we will be like that and have other bodies than our own. Try to make us believe in the evolution theory instead of the abrupt view and proven of life. On the other hand, it may not be a hoax or from the devil, but those beings are not human and not what we will be. Because the devil cannot create so, they may be like angles and holy from outer space. Now traveling through time is not consistent with our promised body, and if we are stable creation, we would not do it that is traveling back to the past and cause instability in the Universe. Thus, all we can do is observe if we go back in time and not change history. Only God and His trusted beings can change history. So, Roswell beings disrupted history; thus, they are holy. It is fascinating that most U.F.O. sighting the U.F.O. disappears in a split second, meaning they travel through space in a different dimension, probably the fifth and sixth dimension. It will not take millions of light-years to go back home where they came from. An Earthly war against U.F.O.s is a lost war because they disappear in no time.

The evolutionist has sinned against God because of what is wrong with the body God gave us and the promised body in Jesus Christ, which has the same shape. So why do the evolutionists reject what God gave us? When the potter makes a cup, you don't question the potter why a cup, in the same manner, you don't ask God why you did not give us three eyes instead of two; this is from the Bible. The bottom line is those beings in Roswell are not going to be our eternal body. Bible: a creature with six wings was covered with eyes all around Revelation 4:8. Darwin's idea is that genes evolve to more complex genes by adding genes, and we will become like U.F.O. bodies from Roswell is wrong. It was portrayed in a T.V. series by Carl Sagan 1980

https://en.wikipedia.org/wiki/Cosmos:_A_Personal_Voyage, which is wrong, and the following article proves Darwin was wrong. https://getpocket.com/explore/item/evolution-that-famous-march-of-progress-image-is-just-wrong?utm_source=pocket-newtab

It was all fake news based on an unproven theory, make-believe.

Finally, in chapter 8 of my dissertation, I ask who enforce the laws in the Universe? It would have to be the angels making sure all the laws of physics are met. In our society, we can see laws, and we have police and other agencies to enforce the laws. Our society must function, and it is the same in the Universe and how it functions. I found out this truth in my meditation, and the angels told me afterward they are happy God created us. The angels exist in a different dimension other than our three dimensions necessary to enforce the Universe's laws. Before the crucifixion, Jesus said that He could ask God to send twelve legions of angels to stop this criminal act by the fanatic Jews. It is evident in these verses of the Bible and other verses that the angles live in a different dimension, and they must be immortal to fulfill this task given by God. The Bible also talks about the angels' power to process energy to causing earthquakes and moving the stone from the tomb. Jesus was buried in the tomb and resurrected Matthew 28:2. Also, Acts 12-16.

Jesus Christ is the unique perfect expression of God, so He is God. His love, His divinity, His sacrifice, His work, His words, etc.

Chapter 4

The Domino Effects

In the future, people will have feedback from God through meditations. God and Jesus told me I am the last and preferred apostle of meditation; everything after that is a domino effect. There is various type of apostle: St Paul was the apostle of the soul. Pastors' deacons are the apostle of the Bible; some preach, and some teach. Fr. Samir Abu Lail, a Melkite Priest, realized I am an apostle when he visited my house at the Epiphany, and he asked me what my mission is? I said healing and peace. My counselor told me the Prophet Moses did not see the promised land. That is how I will not see the results of doing Neurotherapy meditations and Music Therapy meditations, and she called me a prophet. God gave Moses the ten commandments, and He also gave me three physics laws shown in the previous section of this book, chapter 3. Moses makes a prediction: “The LORD your God will raise up for you a prophet like me from among you, from your brothers—it is to him you shall listen” (Deut. 18:15). On January 18, 2021, God told me I created you for that purpose.

Domino effect for generations as God promised. In my family or the Chouery family, there was a history of Saints. As most of us in Cairo and Beirut, we went to a Melkite school, College Patriarchal. We were taught ethics is before education and science, and it was in our alma mater. We were raised to be apostles. Starting with my father, Alexander Chouery, he finished his study to be a priest in the old city of Jerusalem at Saint Ann Seminary, then his father died and went home to help his mother, and he was not ordained. He followed Jesus' instruction to take care of the widow. His mother had five children. But if we start going back in history, there was a convent in the village of Dhour El Choueir in Lebanon (Chouery means you come from Choueir or Dhour El Choueir). The convent name Choueir convent. People throughout the time have taken refuge in Choueir when fighting the oppression of the Ottomans. When the Turks found out about my family, they slaughtered my grandfather's uncle, so the family fled to Egypt. My grandfather Choukri Chouery he was nineteen years old at the time. At my grandfather's time, Lebanese believed that the Ottomans were unfair for occupying the country for 400 years, not helping Lebanese citizens a lot, and not interacting

with them as French people did. They killed too many people, and the country was in danger because they were part of World War I; they did many blockades that made people more destitute and hungrier because there were no dealings with other countries, and so many other bad things happened. Even Ottomans used to hang Lebanese people in Downtown Beirut; therefore, it is called "Martyr's square". Ottomans considered them the Ottoman empire's traitors, but those martyrs were the real voice of freedom. They wanted to liberate themselves and the citizens of more than 400 years of bad occupation.

The way my family ancestor named the first-born son alters Elias and George to the old testament to the Prophet Elijah's time, Elias (sometimes Elian is used) the same name Elijah. George is a Greek name after Saint George (d. 23 April 303), commonly an Orthodox saint. I do not know when the family adopted the name George in their history. But the family were Greek Orthodox; then, some became Greek Catholics. The second-born can be a different name as Choukri, my grandfather. This prompts me to do my DNA chart. On July 9, 2020, my DNA came 91.9% Arab, Egyptian (Coptic), and Levantine. So, I am 89% Levantine, meaning Lebanon,

Syria, Jordan, Israel, and Palestine. Thus, my hunch was right, and I am both an Arab and a Jew. The Arab and Egyptian came from my grandmother on my mother's side. Later, many Jews were converted to Christianity, so is my family. During the old testament time, the whole area was mixed with Jews.

If we go back to 1722, a deacon of Greek Catholic⁸ Melkite Church, name Abdallah Zakher (el-Shammas), took refuge in the St John monastery at Dhour El Choueir when he was inspired to start an Arabic printshop.

https://en.wikipedia.org/wiki/Dhour_El_Choueir His first attempt was in 1706; and developing the printing skills in Aleppo, Syria, while helping the Greek Orthodox Patriarch. He found all the convent documents and started printing the Bible in Arabic with the monks' help. It was the beginning of printing the Bible in Arabic by the Melkite Church and the first homemade printer in Lebanon. He cut the type molds and did the founding of the elegant typeface. He created the

⁸ While the Melkite Catholic Church's Byzantine rite liturgical traditions are shared with [Eastern Orthodoxy](#), the Church has officially been part of the Catholic Church since the reaffirmation of its union with the Holy See of Rome in 1724.

first true Arabic script type in the Middle East. The first book was published in 1733. Logically when you do something like that, God blesses the family for a generation. So, the Chouerys are blessed for giving refuge. And Finally, here I am; it does not need an explanation about God blessing me and gave me living water. After me, they will be many Saints and many new findings in meditations and science, and that is the domino effect. It continues with publications in Living Water 3T 2M, LLC, following Abdallah. Jesus told me in my meditation on July 1, 2020, to publish this book on [the www.livingwater3t2m.com](http://the.www.livingwater3t2m.com) web page.

St Paul and the third Heaven 2 Corinthians 12:2; The **third** concept of **Heaven**, also called shamayi h'shamayim (שמיים or "**Heaven of Heavens**"), is mentioned in such passages as Genesis 28:12, Deuteronomy 10:14, and 1 Kings 8:27 as a distinctly spiritual realm containing (or being traveled by) angels and God.

If God meant for us to go directly to the third Heaven, then the first and second Heaven has no meaning and purpose.

We have already gone to the first Heaven and know most of

it by flying airplanes and understanding most bird creation; we are amazed by Heaven and can glorify God on His work. So, if the purpose is to glorify God with his creation and enjoy it, then going to the second Heaven, the universe, is in God's plan for men and animals to experience it. And as we will be able to go from the first Heaven to the second Heaven back and forth, so is to the Third Heaven, which I do not know what it is. I do not think we need to worry about the end of the universe because there is a third Heaven, and God is with us. We go back to the nature of God: "If God creates something, it stays." Thus, the new Heaven and Earth are meant for men, plants, and animals to experience all three heavens. In Heaven, the Melkite Church says we will not multiply and have children, and your spouse is for you forever. That is true in the third heaven, but in the first and second heaven, we will multiply and have children.

Science is stumped and may conclude to occupy the universe, we need the new body, live forever, and God is a prerequisite to live among us to tell us what to do.

The resurrection is not a matter of choice for God; it is a matter of justice and desire and fulfillment of God's creation

and His Son's desire. Why the whole human race, past, present, and future, be deprived of occupying the Universe and the spiritual Heaven in both systems heaven and the current universe? There must be a resurrection day for all trusted people to enjoy God's creations and His promise to be with us. So, God's desire for human is to continue to reveal Himself and be glorified and praised. Spiritually and scientifically, we can say the time is very, very near for the second coming of Christ, and Jesus will judge based on stability on who can occupy the universe and not cause instability.

Unexplained phenomenon apparition dancing sun the last days is the sun will stop shining or just like Fatima they saw the sun dancing. I could say there will be an illness or a disease that we will not see sunlight. It may not be an illness, but God will blind us in the last days and change our perception, and we will not see the sun, Mark 13:24-37. So, it is an internal change, not an external one. God owns the internal and the external in the universe. The star of Bethlehem that happened when Jesus was born is likely to be external where "wise men from the East" ([Magi](#)) are inspired by the star to travel to [Jerusalem](#). It is a miracle.

Stigmata happens, and Jesus is alive. It is a contradiction in evolution; evolution says it takes thousands of years to see something happen, while the Bible says it happens right away, the time adjustment theory.

Heaven and the seventh dimension are phenomena, and I do not know there are too many unexplained phenomena in the universe.

Evolution and the abrupt changes in the universe, the abrupt change in time is not understood and contradicts evolution because of miracles. So, for the time being, it is another unexplained phenomenon only created by God. And the reality is that the natural time domain is not the same as creating time-domain two different phenomena, and much research is needed.

How about our work in the universe reveals God's wondrous creation with love and enhances his design as God reveals Himself with the ability for humans to create and show his glory. It is an ever-ending Happiness and challenge.

Flying saucers may disappear to another dimension traveling to other stars in a folded universe. For example, in 2D, if a point on paper wants to travel to another point and there is a

line obstacle preventing the travel, if one folds the 2D paper, then the point travel happens instantly in 3D. Thus, adding a dimension expedite travel.

With our present technologies or future technologies, we cannot reach the universe; we need to travel in the fifth and sixth dimensions, and God will give that. If we can expedite the time (time/Gravity interchange Russell Humphreys Ph. D. hypothesis), we can instantly be on a different planet.

With our new body, we can visit any planet with any composition or atmosphere and possibly live on them.

We cannot look at these miracles and say it is not scientific. It is like 1000 years from now; people look at our science and say it is not scientific. All these miracles, including the Bible, are to be examined scientifically.

Global warming:

I have no respect for people who do not believe in science and claim it is fake news. There are countless pieces of evidence showing they are mistaken. I do not have to say much; look at all the buildings, stadiums, monuments, pyramids, towers, dams, airplanes, cars, vessels, etc., built

using science. Are those people blind? At this point in history, not believing in science is like not believing in water to drink. I learned in Structural Engineering that everything we do is philosophy except deflections⁹ because it is real. Throughout history, we have proven our philosophy and deflection numerous times with all existing and past structures, and the science we use is correct. Why are they saying global warming is not true unconvinced what science confirm. Why the anti-science sentiments? And three months before the U.S. election, blaming NIAID director doctor on the 2020 Pandemic. Is Trump must always have an enemy to blame he cannot take responsibility? It is no way to fight the battle to stop the disease. It is a narrow mind and a smear campaign. Currently, the truth is voters are holding Trump responsible for the coronavirus pandemic in the U.S.

Global warming came abruptly or not anticipated showing the flaw in evolution theory that changes are not a continuum of gradual change but are abrupt. We will have an abrupt

⁹. The first law of physics I proved the existence of God with deflection. I cannot do a laboratory experiment on every planet, the universe. Thus, faith must be used.

change in humanity and receive the new body promised by Christ. With global warming, we will become extinct in 200 years, and that is it; you are mistaken; the universe is created for a purpose, and we see it is practically empty; this strongly indicates that there is a plan by God for us to travel into space. Our new body will survive the heat and radiation. So even if the Earth changes, we will be able to occupy it. We are surviving global warming until the resurrection will be challenging, but God gives manna to the Jews for 40 years in the heat of the desert.

The secret of time:

People of every generation thought they know everything, and history proves otherwise. Do we know the secret of time? Are we ever going to know, or maybe it is not allowed.

Gods expedite the time but not necessarily at the speed of light, just fast for human comprehension.

God can change time and adjust the time, as seen in miracles. If God gives us that power, we will be able to create. I got accepted to the master's degree program in mathematics at the University of Washington in 1974. I went to my math advisor and showed him the solution and proof to the

Pythagorean new equations in the fourth dimension and an alternative solution to the Quartic equations. He said it has been solved before and broke my heart. The Quartic solution has not been given before in which I tried to publish unsuccessfully later in life, and it was published by someone else ten years later after my attempt. Now, after 45 years, it is recognized that I have solved it after suffering many sufferings. When I found out, it made me sick to my stomach for three days, starting on February 25, 2018. I was not jumping up and down that I won. The story of why I had to find an alternative to the Quartic Equation started in 1973. I was working for a civil engineering firm, and I had a conversation with a visiting contractor. I told him I am studying at the University of Washington Electrical Engineering, and we use imaginary numbers. He laughed and thought I was delusional. I realized we are using the Quartic Equation in Shoring and Foundations. So, I had to develop a solution that does not use imaginary numbers and guarantee real numbers. I told this incident to a math teacher; he said you should have said complex numbers instead of imaginary numbers. I realize I cannot educate the public; they never understand. A few months later, in 1974, after the

bad news from the math advisor, I was hospitalized with a mental break down after I enrolled in the master's program in Electrical Engineering and withdrew. When I recovered, I enrolled in the master's electrical engineering program and left mathematics, and obtained my master was in 1979. Due to circumstances created by God, I switched fields in engineering. God took me from a rich department in research funding (electrical and computers) to a poor department in research funding (structural and soils), so you have to research on your own, and I went to school and got my master was in structural in 1984. I applied what I learned in Electrical Engineering to solve Civil Engineering problems using the Fourier transform and Fourier Series. Later, I received discouragement from the advisor of the structural engineering department of the University of Washington. I finished my master's in civil engineering in the structural program. I asked to enroll in the Ph. D. program when my advisor said, we will kill you, we will make you work so hard, and what is the use you are old (I was 33 years old) and you will not find a professor job, but I was not interested in being a professor just the research. I continued my research on my own and tried to publish numerous articles, seven to

be exact; in later years, the publisher said they are correct and declined to publish for ridiculous and unethical reasons comments by the reviewers. The world is corrupt even in this. At this point, I feel like Galileo, but instead of the church persecution, it is the academic community. They live in a different world, just like the time of Galileo. Anyhow, I am using my talents in this book, and I feel I am contributing to humanity. So, I stayed with Structural and Geotechnical to be of service. It is clear to me why I could not enroll in the Ph. D. program in 1984; my research on arching of beams and contact shear (published in facsystems.com) was too far into the future and changed the general perspective on beams. General loading due to contact shear and the world was not ready for my research at this time. The work on contact shear was done in 1983 during college. When I showed the solution for contact shear to my past advisor in 2009, he said it had been solved before, which was not true. I send the article to an independent retired professor, Professor Brown, who was my old teacher, and he said it is a potential for publication, implying it has not been solved. I finished the article on the Arching of Beams in April 2020 and published it on my webpage facsystems.com. When I

finished the synopses in 2012, I told my boss Sven Lie at the Army Corps of engineers that I would not finish the article because I did not want to be responsible for airplanes, ships, and cars; actually, I was scared. On December 12, 2019, in my meditations, when visualizing angels, I heard the angels say, "we will protect you," followed by God's voice, "see, you have nothing to worry about." Two days later, I did my meditation and received an invitation from Jesus. He said, "why don't you finish your article." I told him you must help me. He did. I published the article, and I am not scared or worried anymore. Jesus agrees with our human structural philosophy of elastic materials. On April 21, 2020, California Lutheran University asked me if I am still interested in the PsyD in Clinical Psychology Program because I was on their mailing list since December 2016 when I asked for an information packet. On April 24, 2020, I spoke with a counselor on the phone, and she recommended Fielding Graduate University because of my age (I am too old to be a counselor; I am 69 years old). I emailed the Fielding Graduate University and asked them if they have research restrictions on researching Christian Meditation related to the separation of Church and State. I received an

email from the president saying there is no conflict, and I will be the only one working on the research. So, I applied for admission to Fielding Graduate University, and the application was very challenging. I told them in the statement of purpose that I was not interested in being a counselor, just Christian Meditations publications. God told me in my meditation, "it is needed; they will take you." I negotiated the red tapes, and I was accepted on July 14, 2020, in Postbaccalaureate Certificate in Clinical Psychology. A new chapter started in my life. It is for a one-year study; after that, I should be accepted into the doctoral program in clinical psychology at any university. I am hoping to be accepted at the University of Washington in Fall 2021. I completed the first term at Fielding Graduate University on December 20, 2020, and passed with a good grade.

I have been bullied all my life, starting in k-12 grade school by the same students for ten years, in college by professors, and at work by my bosses and work colleges. Jesus told on June 24, 2020, that is the price of being an apostle. That day when He spoke into my heart in the evening, I was incredibly sad and depressed about my experience most of

the day. Jesus cheered me up and asked me to forgive; then that night, I worked on the song that I composed in 2010, "A Prayer on Mount Olives," finding all the different instruments to put on the computer software. Even when I was starting my career, I was working for a soil engineer back in 1971. My boss Paul gave me a test he found in the Seattle Times newspaper posted by NASA. The ad said if you score from 90-100% on this test, please call this phone number. I scored 99% and told Paul. He said I scored 100%, and I am not going to call NASA. Well, I did not make anything of it. I have been in the U.S. for a year and a half and did not know the system or NASA. Years later, when I figured out my boss and realized he was a con artist, he was bullying me, and I lost that opportunity to call NASA.

I don't particularly appreciate picking on just Americans only. I will tell you a story in Beirut, Lebanon, in 1967-68. I had a band called the Night Riders, and I composed a song called Crazy Woman. A street publisher paid for recording the song and made a 45 Record. To escape paying the royalty to the composer, they misspelled my last name on the record on purpose; they put Shoueley instead of Chouery on the record vinyl, and I did not get paid one cent for my work.

We just performed the song on T.V. The song was an immediate hit. It is probably still being sold in Lebanon. They were crooks.

Time is unsolved, but we know it is in the fourth dimension, and we need to explore the properties in the fourth dimension using Pythagorean theorems and relations.

Ameba, to man, can be done in a split second. Startrack II attempted to do it. If we have the secret of time, we can live forever because we can reproduce ourselves. Christ has the secret of time. He demonstrated in feeding 5000 people fish and loaf of bread angles went to the sea collected the fish in a split second. So, the natural time is not the creation time; it is two different times. Time is a mystery. I do not know if God will ever give us the secret of time. Most likely, it is not allowed. However, the Orthodox Church of Christ believes that God came as Christ so we can become Christ. That is not true; we only will become like Christ. 1 John 3:2, Dear friends, now we are children of God, and what we will have not yet been made known. But we know that when Christ appears, we shall be like him, for we shall see him as he is. The secret of time and the secret of multi-dimension will eventually be revealed. But we will not be Christ because

Christ's brain is male and female simultaneously, and He is fully complete, as I explained in my dissertation in livingwater3t2m.com. Jesus said a disciple could not be above his teacher.

Luke 6:39-42 ESV

39He also told them a parable: "Can a blind man lead a blind man? Will they not both fall into a pit? **40**A disciple is not above his teacher, but everyone, when he is fully trained, will be like his teacher. **41**Why do you see the speck that is in your brother's eye but do not notice the log that is in your own eye? **42**How can you say to your brother, 'Brother, let me take out the speck that is in your eye,' when you yourself do not see the log that is in your own eye? You hypocrite, first take the log out of your own eye, and then you will see clearly to take out the speck that is in your brother's eye.

Matthew 10:24-33 NIV

24"The student is not above the teacher, nor a servant above his master. **25**It is enough for students to be like their teachers and servants like their masters. If the head of the

house has been called Beelzebul, how much more the members of his household!

26“So do not be afraid of them, for there is nothing concealed that will not be disclosed or hidden that will not be made known. 27What I tell you in the dark, speak in the daylight; what is whispered in your ear, proclaim from the roofs. 28Do not be afraid of those who kill the body but cannot kill the soul. Rather, be afraid of the One who can destroy both soul and body in hell. 29Are, not two sparrows sold for a penny? Yet, not one of them will fall to the ground outside your Father’s care. ^b 30And even the very hairs of your head are all numbered. 31So do not be afraid; you are worth more than many sparrows.

32"Whoever acknowledges me before others, I will also acknowledge before my Father in Heaven. 33But whoever disowns me before others, I will disown before my Father in Heaven.

Because occupying the universe requires communication with God, if there are aliens, they would be holy just like angels because of the instability theory.

God holds the key to time.

The secret of multidimensional space: God set us up in the three-dimension space to remind us of Him Father, Son, and Holy Spirit. The other dimensions will be revealed upon the second coming of Christ. The number eight reflects a new beginning. My reason for music is the next octave. This number will be reflected upon Christ's second coming. The apparition of Mother Mary from a different dimension has been happening on Earth.

The parting of the Red sea is external feedback. Going through closed doors, walking on water all has to do with multidimensional space. A research scientist in psychology experimented on sending waves or magnetism on the spot where the brain is excited with God's belief. The people that wore the helmet felt like floating in space. What if the weight has changed? No one has investigated the weight. Meaning we can walk on water with God.

If we say it is possible to walk on water, we break the barrier scientists need to discover new things. You can always conclude that Christ is God, and He can create a new dimension and walk on water. We do not know everything

that is going on in the universe. Breaking this barrier allows us to go to other planets without using the time dimension to travel in the fifth and sixth dimensions.

The idea of alien intruders is very human; it is shown in many Hollywood movies this fear. If there is another occupant in the universe that can travel to another planet, they would be holy since they would be stable and cares for the universe and do not cause instabilities in the universe; it is a requirement.

Going through closed doors as Jesus did means using an external dimension other than the three dimensions. It includes Jesus walking on water. Everything in science is questioned, including the history and facts shown in the Bible.

Beware of the sins of the scientist and witchcraft in science. For example, being so fanatic about evolution's time domain, skipping God from the evolution, and failure to see that evolution is gradual and abrupt because Darwin thought it is only gradual. Theory without laboratory experiment to prove it is a fact remains an unproven theory and just make-believe, and that is the bitter truth. See reference

Evolution: That Famous 'March of Progress' Image Is Just Wrong

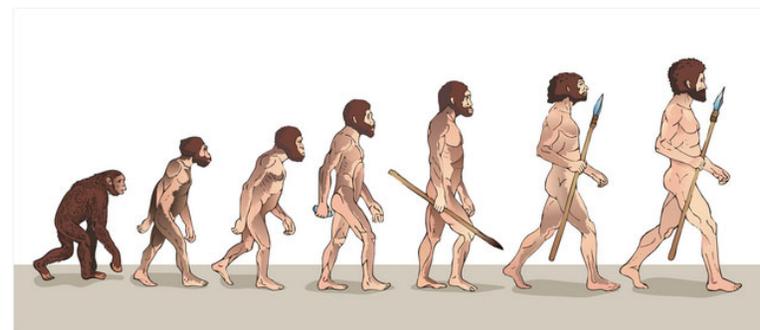

Photo from Usagi-P / Shutterstock.

Darwin's evolution is only a theory since it has not been proven in the laboratory. Every theory used in science and engineering was confirmed in the laboratory. It became not a theory anymore, and it is a fact—the foundation of science in the laboratory. For example, Dr. Albert Einstein believed light has mass, where people of his time thought light is just rays. He did a laboratory experiment and proved light has mass.

Consequently, he was awarded the Nobel Prize. Now it is a fact light has mass. Note: mathematics is not the foundation of science; it is a tool to help us know what to expect in the laboratory.

So, the Survival of the fittest theory is not proven in the laboratory, and how can it be done? It is more believable that God must act in the survivor of the fittest transition, and faith must be employed. The continued existence of organisms that are best adapted to their environment, with the extinction of others, is a concept in the Darwinian theory of evolution. I do not think humans, animals, or plants can think themselves into new genes because of the environment and survivorship. Mostly plants do not have a brain; they cannot think. It must be abrupt and induced by God. New research shows animal evolution often involves losing genes and becoming less complex. DNA molecular structure (or genome sequence) was discovered in 1953, one ninety-nine years after Darwin's publication in 1854 "On the Origin of Species." Darwin based his theory on observations. So, science is now trying to verify the Darwin theory of complexity due to adaptation to the environment. And they could not and called it random, for lack of not knowing the

mechanism. My only critic of this article the statement, "We consider this the perfect summary of evolution, a booze-induced random choice between the bar and the train track." My first physics law says nothing at random all is unique, so adding genes or subtracting is a function of God, and it is gradual and abrupt.

Darwin also said mating is done by chance, contrary to physics' first law, stating nothing at random. He is correct; the genes change by mating. But everything happens for a reason. It is an attraction that causes mating, and the time and place are not random; it is meant to be. I believe my imaginary friend in kindergarten in Egypt was my wife. I was astonished when I saw her childhood picture; it was the same person. As I explained in my dissertation in a miracle, there is a lot of energy because of the new cell or repaired cells; when applying Einstein equation $E=mc^2$, we find the energy is very high at the same time, there is a shift in time because the cells have the exact age of the person. It is an indication that at the start of the universe, where there was a lot of energy, there must have been a shift in time. So, the time domain is incorrect, and there is a lot of work to be done. Therefore, the natural time does not coincide with the

creation time. It is a fact in nature, and a laboratory experiment is not needed; we have enough miracles records.

A current example is in a wound in the new flesh, when the person is healed, matches the person's age. So, what is the creation time? At the maximum of two months, two years. What is natural time? The age of the person 20, 30 years, etc. So, they are not the same. It happens in a tree growing branches; the creation time for a branch to happen is in a season; the natural time is the tree's age. So, they are not the same. What if our universe is a branch and not a tree? Saying the universe is 13.7 billion years old is not believable when God's priority is Heaven and Earth. So, it is imminent, and God is the water that gives life to the branch and the tree; He is the living water. So, the creation's age is a mystery. While the natural time is done using methods to measure the tree's age, not the branch. Likewise, some trees have new leaves and flowers every year. So, what is the creation age of one leaf? It happens once a year. At the same time, the natural age of the leaves and flowers is the tree's age. Also, the sea creatures are many. We find an octopus has many arms; if one arm is cut, the octopus grows another arm; there was lots of energy. So, the age of the new arm is much less than the

age of the octopus. Thus, there is a shift in time because the natural age is the original octopus's age. So, why people ignore the facts about the creation and see the shift in time?

Another example is about an abrupt change that happened, and a volcano erupted, and a mountain was developed. You ask the question of how old the mountain is? The geologist says it is 507-million-years-old. So, he quotes the natural time. But it was only two days ago and was accumulated in several eruptions, so it was dynamic, not static. So, do people care about natural time? They only care about the real world and the new Earth. For example, Mt. Saint Helene erupted in 1980, and the whole geometry of the mountain changed, so it is a created mountain. Thus, the mountain creation time is 40 years old; that is what matters to the public because time is a mystery, and only God knows how old geologically it is. Because of these examples, people start saying science is fake news. In reality, Darwin's evolution wounded science because it is not proven in the laboratory, and some people are still fanatics about Darwin and still believe his theory. It is evidence of cognitive bias and arrogance.

Nevertheless, the physicists' task is to find the equation of shift in time and becomes another unsolved problem. Jesus told me on April 30, 2020, in my meditation, the most significant embarrassment in history is your point on evolution. It is about the truth and not make-believe. For example, some human qualities are praying, cooking, and playing musical instruments, so show me an animal that can do that any time in history. We must take the human out of the mammal kingdom and put them in the human kingdom because humans can communicate with God, and God can communicate with humans. All creatures with a brain can communicate with God, except humans can talk and pray to God. I understand the separation of Church and state requires not mentioning God in public schools. It is an amendment in the United States constitution, allowing people to have their religion or choose not to have faith. But God does not need to be mentioned; blame the finding on physics, start with physics' first law, and let the students choose to believe in God. For example, say physics shows everyone is created special, unique, and has something to contribute, and everyone has a mission, and there is nothing at random. If

they choose to believe in God after hearing my three physics laws, teach them the ten commandments.

Teach kids the golden rule

Matthew 7:12 English Standard Version (ESV)

The Golden Rule

¹²“So whatever you wish that others would do to you, do also to them, for this is the Law and the Prophets.

Teach them there must be feedback for all creation, and God will always talk to them. Teach them how to meditate.

In the 60s, they removed prayers from public schools; the result currently is 3 out of 5 have a mental illness because the internal feedback was not encouraged. We have to change that.

Anyway, mathematics is truth; that is why Jesus talks to me in mathematics. He is the truth. God told me in meditation for releasing Christian meditation through Living Water 3T 2M, LLC: **It is time!!!** And that what He said to me in my meditation. I do not doubt that my meditations cause humans to evolve gradually. Only God can cause an abrupt change in evolution. It will happen upon the second coming of Christ.

The universe is alive with a unique deflection and a spirit, and the universe has a heartbeat. Quantum Spirituality, flying saucers, if they exist, they travel in the universe through a different dimension. That is why people see them disappearing into space.

In Heaven, it will be socialism, and God is on top. On Earth, communism does not work since God is not physically present on Earth, and Satan dominates the world; it will happen in Christ's second coming. Christian meditation that I proposed in my dissertation will cause a change in the gene, thus evolving and preparing us for the day the Lord comes.

For the time being, the best is a democracy, and I believe dictatorship is worse than communism and causes lots of pain as I experienced it in the Middle East, both socialism and totalitarianism.

Chapter 5

Visualization and Music

I played guitar in the Catholic Church, then in The Lutheran Church (ELCA). I remember a situation I experienced in Atlanta, Georgia, where the images have not left me since. I was 22 years old in 1973. I had a summer job in Atlanta, and I lived in a room by myself in a house. My landlord was a woman. I decided to go to a movie, and I took my bicycle to the theater. It was a Black neighborhood, and the movie was about slavery, which was profoundly choking, and how this black man fought and died for freedom. I was the only white man in the theater; I am not quite white; I am neither black nor white since I am from the middle east. I noticed everybody in the theater looked at me in disbelief, questioning why this person is here. Then I had another experience because I play guitar in a Catholic church in downtown Atlanta. The group of musicians wanted to give to the poor. So, I pitched a couple of dollars, and they decided to go to the ghetto to give to the poor. So, I decided to go with them where our leader knew of a black family in need.

We parked the van far away, and we walked to the ghetto. I was surprised at how poor the living houses were. It was a shock for me coming from Egypt, where there are minor discriminations toward black. It was lower than the bottom in the U.S., and like what I have seen in Egypt, where the maids lived in one room on the terrace of our apartment building. We went to the family and set the food on the table. We made a circle, and we prayed in tongues. So, I prayed the Our Father in Arabic. But I learned music and prayer heals as I saw it in their facial expression as we prayed in tongues.

God wanted me to help people live the Bible through music with Neurotherapy. After getting hurt at the Army Corps of Engineers by my boss John, I stopped doing mathematics and physics. He was no scientist; he was an interior architect. He stopped me from using the arching graphs that I published on my web page with Professor John F. Stanton at the University of Washington. I finally told him this was my thesis in my master's at the University of Washington. Years later, I told him this was submitted to the State of Washington in 1984, which they developed a table of arching for shoring. I always thought that science articles are self-explained. He told me he read my article and still did not

allow the use. Finally, he allowed the structural department to use it years later. Now it is a document in the Army Corps of Engineers. But the damage was done. I did not feel to do any more scientific articles, and he finally retired in August 2018. Now I look at my articles in all fields and know there is a lot that needs to be done, and it is left for the future to complete. I told EEO (Equal employment opportunity means freedom from discrimination based on protected classes such as race, color, sex, national origin, religion, age, disability, or genetic information.) about what happened. Before I left the Army Corps of Engineers, I was discriminated against by my old boss John (he had retired the prior year). She said we did what we can with John. On Wednesday, December 11, 2019, I told my wife Bernice how I feel about this; she said, you are now making music. So, I was relieved; I remember Brandon Southerlin, the Geospatial Production Specialist at the Army Corps of Engineers, who is not an engineer. He told me meditation, and everybody can understand, while in mathematics, not everyone can understand. He told me that a few months before I left. So, now I am dedicating the rest of my life to write meditations with music following God's request. God told me in deep meditation using music therapy

in early 2018: "When I give you the money, it will be just music with meditation" then I saw a white satin heart, a pure heart, and there was nothing physical, all spiritual. Well, I did not wait for the money, and I opened a new company, Living Water 3T 2M, LLC, to do meditations and music. I retired, realizing I cannot do the work at the Army Corps of Engineers and work at FAC Systems Inc. and meditations and music. So, I retired from the Army Corps of Engineers on August 31, 2019. I told Colonel Mark A. Gerald, Commander of the Seattle District Army Corps of Engineers, at the army corps picnic in July 2019 that I cannot do all three assignments. He said meditation is not closing your eyelids. So, he encouraged me. I told my counselor this is typical of God; he asked Abraham to slaughter his son, and there was a different plan. So, I am not waiting for money. I start now. It was a coincidence of publishing the meditations before the coronavirus pandemic, and God knows why He asked me. I checked YouTube, one of my sponsors, in June 2020, and my published Christian Meditation was the most popular of all my work. Later, this year in my music meditation, Jesus asked me to travel the world and visit churches and talk about my article and meditation published

in livingwater3t2m.com; I told Him I do not have the money. He said it would come. Shining more light on the story when on December 12, 2019, I was in the presence of angels, and they said they would protect me, then God said immediately, "see, you have nothing to worry about." It happened when doing music therapy meditation. On December 14, 2019, Jesus told me in my meditation that I will get back to mathematics and physics shortly after He heals me, and you can finish your article. I told Jesus you would have to help me with the article, and He said I would. I believe Jesus was interested in this article for the safety of the world. I am excited to give God the glory, and I understood what God meant on December 12. The article Jesus was referring to be the "Arching of Beams," published the synopsis on my web page in 2012 on the FAC Systems web page. I did not want to finish the article because I did not want to be responsible for every structure, including airplanes, ships, and cars, and I told that to my other boss Sven Lie at the Army Corps of Engineers back in 2012. But now, God permitted me. I started to work on it, and I had two solutions, one from Jesus, and the other was mine because I did not believe Jesus' solution. When my solution blew up, and the

deflection went to infinity, I knew something was wrong with my solution. Instantly Jesus said, go back to the solution I gave you. By December 24, 2019, I finished phase one of the solution, and everything was checked, and the physics made sense. It took a week of meditation to understand the physics in Jesus' mathematical solution, and my head was hurting from thinking. I was incredibly happy with Jesus' Christmas present. The article was finished and published on my web page facsystems.com on April 4, 2020.

I took a psychology class on sleep on November 7, 2019. I realized the problems people must fall asleep. I went home and wrote some ideas for sleep meditation. I felt the Holy Spirit in my guts asking me to write a symphony that people can listen to it and fall asleep. Days in my meditation, I realized God is not going to let me off the hook. A month later, I could not come up with anything, but Jesus said to me that the Holy Spirit is in you in my meditation, and I put my hand on your left shoulder in the vision when I was 22; the music will come. Finally, in November 2020, God allowed me to consult with the music department at the University of Washington when I am in the program. I told Pastor Elise at Ballard First Lutheran about that.

<https://www.rueckertadvertising.com/news/105-five-questions-with-fr-mark-chesnut>

“What is inner healing?”

Christian inner healing is a unique form of prayer and prayer ministry that attempts to free people from the negative emotional and spiritual effects of prior traumatic experiences. It uses various prayer techniques that encourage people to acknowledge and remember past hurtful situations and visualize Jesus with them at that moment, bringing healing to those memories.”

On November 28, 2020, I told Pastor Erik we need meditation for every Bible story in a phone conversation. It is an effort to make people live the Bible, and I told him it is a lot of work. He said yes, they need to be choreographed, and I agreed. After I hung up, I saw the devil very mad and said, you cannot do it. I told him with Jesus; I can. He immediately disappeared. Most Rev. John Elya Archbishop Eparch Emeritus for Melkite Church USA, who died in July 2019, read my book on visualizing Jesus in 2007 and told me meditation goes across the board non-denominational. I welcome all the churches to participate and help me.

Chapter 6

Praying with the left and right hemispheres of the brain.

Here is some information from the web

Left Vs. Right

<http://web-us.com/brain/LRBrain.html>

Which Side Are You On? Or can you be on both sides?

[Take the Hemispheric Brain Dominance Test](#)

[Basic Right-Brain and Left-Brain Characteristics](#)

In general, the left and right hemispheres of your brain process information in different ways. We tend to process information using our dominant side. However, the learning and thinking process is enhanced when both sides of the brain participate in a balanced manner. It means strengthening your less dominant hemisphere of the brain.

Listed below are information processing styles characteristically used by your right or left-brain hemisphere your brain processes information.

[Linear Vs. Holistic Processing Logical Vs. Intuitive](#)

[Sequential Vs. Random Processing Verbal Vs. Nonverbal Processing](#)

[Symbolic Vs. Concrete Processing Reality-Based Vs. Fantasy-Oriented Processing](#)

Linear Vs. Holistic Processing

The left side of the brain processes information in a linear manner. It processes from part to whole. It takes pieces, lines them up, and arranges them logically; then, it draws conclusions. The right brain, however, processes from whole to parts, holistically. It starts with an answer. It sees the big picture first, not the details. If you are right-brained, you may have difficulty following a lecture unless given the big picture first. That is why a right-brained person must read an assigned chapter or background information before a lecture or survey a chapter before reading. If an instructor does not consistently give an overview before he or she begins a lecture, you may need to ask at the end of class what the next lecture will be and how you can prepare for it. If you are predominantly right-brained, you may also have trouble outlining (You've probably written many papers first and outlined them later because an outline was required). You are the student who needs to know why you are doing

something. Left-brained students would do well to exercise their right-brain in such a manner.

Sequential Vs. Random Processing

In addition to thinking in a linear manner, the left-brain processes in sequence. The left-brained person is a list maker. If you are left-brained, you will enjoy making master schedules and daily planning. Your complete tasks in order and take pleasure in checking them off when they are accomplished. Likewise, learning things in sequence is relatively easy for you. For example, spelling involves sequencing – if you are left-brained, you are probably a good speller. The left brain is also at work in the linear and sequential math processing and following directions. By contrast, the approach of the right-brained student is random. If you are right-brained, you may flit from one tack to another. You will get just as much done, but perhaps without having addressed priorities. An assignment may be late or incomplete, not because you were not working but because you worked on something else. You were ready to rebel when asked to make study schedules for the

week. But because of the random nature of your dominant side, you must make lists, and you must make schedules. It may be your only hope for survival in college.

You should also make a special effort to read directions. Oh yes, the mention of spelling makes you cringe. Use the dictionary, carry a Franklin speller, use the spell checker on your computer. Never turn in an assignment without proofing for spelling. Because the brain's right side is color sensitive, you might try using colors to learn the sequence, making the first step green, the second blue, the last red. Or you may want to "walk" a sequence, either by physically going from place to place or by imagining it. For the first step of the sequence, you might walk to the front door, for the second, to the kitchen, for the third, to the den, etc. Or make Step One a specific place or thing in your dorm room or study place, and Step Two another. If you consistently use the same sequence, you will find that this strategy is transferable to many tasks involving sequence.

Symbolic Vs. Concrete Processing

The left brain has no trouble processing symbols. Many academic pursuits deal with symbols-such as letters, words,

and mathematical notations. The left-brained person tends to be comfortable with linguistic and mathematical endeavors. Left-brained students will probably just memorize vocabulary words or math formulas. The right brain, on the other hand, wants things to be concrete. The right brain person wants to see, feel, or touch the real object. Right brain students may have had trouble learning to read using phonics. They prefer to see words in context, to see how the formula works. To use your right brain, create opportunities for hands-on activities, use something real whenever possible. You may also want to draw out a math problem or illustrate your notes.

Logical Vs. Intuitive Processing

The left-brain processes in a linear, sequential, logical manner. When you process on the left side, you use information piece by piece to solve a math problem or work out a science experiment. When you read and listen, you look for the pieces so that you can draw logical conclusions. If you process primarily on the right side of the brain, you use intuition. You may know the right answer to a math problem but not be sure how you got it. You may have to

start with the answer and work backward. On a quiz, you have a gut feeling as to which answers are correct, and you are usually right. The left brain pays attention to mechanics such as spelling, agreement, and punctuation in writing. But the right side pays attention to coherence and meaning; that is, your right brain tells you it "feels" right.

Verbal Vs. Nonverbal Processing

Left brain students have little trouble expressing themselves in words. Right brain students may know what they mean but often have trouble finding the right words. The best illustration of this is to listen to people give directions. The left-brain person will say something like, "From here, go west three blocks and turn north on Vine Street. Go three or four miles and then turn east onto Broad Street." The right brain person will sound something like this: "Turn right (pointing right), by the Church over there (pointing again). Then you will pass a McDonalds and a Walmart. At the next light, turn right toward the B.P. station." So how is this relevant to planning study strategies? Right brain students need to back up everything visually. If it is not written

down, they probably will not remember it. And it would be even better for the right brain students to illustrate it. They need to get into the habit of making a mental video of things as they hear or read them. Right brain students need to know that it may take them longer to write a paper, and the paper may need more revision before it says what they want it to say. It means allowing extra time when a writing assignment is due.

Reality-Based Vs. Fantasy-Oriented Processing

The left side of the brain deals with things the way they are with reality. When left brain students are affected by the environment, they usually adjust to it, not with right-brain students. They try to change the environment! Left brain people want to know the rules and follow them. If there are no rules for situations, they will probably make up rules to follow! Left brain students understand the consequences of not turning in papers on time or failing a test. But right brain students are sometimes not aware that there is anything wrong. If you are a right-brain, make sure you constantly ask for feedback and reality checks. It is too late the day before finals to ask if you can do extra credit. Keep a careful record

of your assignments and tests. Visit with your professor routinely. While this fantasy orientation may seem a disadvantage, in some cases, it is an advantage. The right brain student is creative. To learn about the digestive system, you may decide to "become a piece of food! And since emotion is processed on the right side of the brain, you will probably remember well anything you become emotionally involved in as you are trying to learn. These are just some of the differences between the left and right hemispheres, but you can see a pattern. Because left-brain strategies are often used in the classroom, right-brain students sometimes feel inadequate. However, you now know that you can be flexible and adapt the material to the right side of your brain. Likewise, those of you who are predominantly left-brain know that it would be wise to use both sides of the brain and employ some right brain strategies.

What Is Left Brain - Right Brain Theory?

<https://www.verywellmind.com/left-brain-vs-right-brain-2795005>

According to the theory of left-brain or right-brain dominance, each side of the brain controls different thinking types. Additionally, people are said to prefer one type of thinking over the other. For example, a "left-brained" person is often said to be more logical, analytical, and objective, while a person who is "right-brained" is said to be more intuitive, thoughtful, and subjective.

In psychology, the theory is based on what is known as the lateralization of brain function. So, does one side of the brain control specific functions? Are people either left-brained or right-brained? Like many popular psychology myths, this one has a basis that has been dramatically distorted and exaggerated.

The right brain left brain theory grew out of Roger W. Sperry's work, who was awarded the Nobel Prize in 1981. While studying the effects of epilepsy, Sperry discovered that cutting the corpus callosum (the structure that connects the two hemispheres of the brain) could reduce or eliminate seizures.

However, these patients also experienced other symptoms after the communication pathway between the two sides of the brain was cut. For example, many split-brain patients found themselves unable to name objects that were processed by the right side of the brain but could name objects that were processed by the brain's left side. Based on this information, Sperry suggested that the left side of the brain-controlled language.

Later research has shown that the brain is not nearly as dichotomous as once thought. For example, [recent research](#) has shown that abilities in subjects such as math are strongest when both halves of the brain work together.

The Right Brain

According to the left-brain, right-brain dominance theory, the brain's right side is best at expressive and creative tasks. Some of the abilities that are popularly associated with the right side of the brain include:

- Recognizing faces
- Expressing emotions

- Music
- Reading emotions
- Color
- Images
- Intuition
- Creativity

The Left Brain

The left-side of the brain is adept at tasks that involve logic, language, and analytical thinking. The left-brain is often described as being better at:

- Language
- Logic
- Critical thinking
- Numbers
- Reasoning

How Do you Pray?

Best prayers are verbal with images, preferably with background music or Left and Right use of the brain to

pray to God from all our mind and strength. On Sunday, May 24, 2020, my wife and I were attending the virtual service of Ballard First Lutheran Church, it was virtual due to the coronavirus, and it was about the ascension of Jesus to Heaven. As I heard the bible reading, I was pulled back in history, or in time a second time since it happens in the synagogue the first time, this time to be with the apostles, and I was there with them it was real, where Jesus was instructing them of what to do before He ascended. He said to me, "Farid spread meditations and visualization." I felt my heart is heavy, and I felt the burden. I told my wife, and she said, do not be burdened; you are just trying to perfect meditations. Now twice, I traveled back in time, proving the other dimensions, and have seen the five angles in a different dimension.

When my wife and I decided to publish the book Visualize Jesus on Smashwords.com, and I did that day. It was a recommendation by Sister Laura Swan from St. Placid Priory, a Benedictine Monastery in Lacey, Washington, after she read my book. In the night, I did my music meditation therapy. I visualized the sunset in Hawaii with warm weather, and I was sitting on a log by the beach going

through the day with Jesus, and there was a fire pit in front. The log is out of respect for the cross. When toward the end of that piece of music, I saw Jesus in a white robe approach and kiss me on the cheek. So sometimes, with visualization, God may take over the visualization scene and surprise you.

The right hemisphere of the brain is holistic and visual, right brain versus left brain. Some people are threatened with visualizing Jesus and persecuting and judging others that imagine (some of those people are on the web; someone wrote it is creating idols, why he or she is judging others.) Christ commands us not to judge; see the log in your eye. The Bible was written by people some time ago, and it was always after the facts. Some people believe that all the information from God happens only by the end of 2000 years ago, and no more information can be given at a different time. If they do not find it in the Bible, they are threatened. Why? God can send another apostle in another time, just like He sent St Paul. Christ appeared to me, and the Holy Spirit asked me later to write a book on visualization. So, he asked me for something specific if you visualize God, you are asking for His presence, and thus the third commandment applies.

Why did God not give that information 2000 years ago, or did he and Satan steal it from us? And men lost their ability to perceive Him using the eyes of their hearts and use the right hemisphere of the brain. So, God sent me to correct this problem as we have found out scientifically how the brain works, and we can pray with all our minds. You may choose not to trust a Priest or a Pastor, but you can trust me as a Structural Engineer. The Holy Spirit is timeless and keeps revealing Christ through time. Now the Holy Spirit calls people to meditate and use visualizations and deep meditations for the time for the Lord's coming is very near. I wrote the book Visualize Jesus: Ten Ways to Christian Meditation. I am a scientist, and I recorded my finding accurately to the best I can and not worry about what people say.

Love is the connecting thing in the universe.

If we have a pill that makes us not sleep, the world will become slaves to business capitalists or communist government. They will make you work more hours for less pay. It is evil to research such a drug. We need to pray for

protection from God, and it is an urgency to meditate. That is why ethics is before science.

Having education relies on each other knowledge and expertise. But some research is not allowed. Music and meditations only spiritual music and songs stay with us. Meditations help compose spiritual music. It seems the only music that stays with us is spiritual and kept in the House of Worship and Universities, so if you want to compose a timeless song or music or symphony, start composing spiritual music.

I feel sorry for those who give their lives to science instead of God and had no music, imagination, visualizations, and daydreaming instead of going from A to B to C to D. It is a very dry life.

Money and work: our call will always be to inhabit and praise God as in Genesis 1. In eternity, as God continues to reveal more of Himself, we will become happier.

The current physics theory and the universe are not found from future technology and computers; everything we see results from God's creation. We cannot live as in 2000 years ago, God's creation is dynamic, and we need to live in the

present, and our genes are not the same when effected by Jesus. God will always give information as before, starting with Adam and Eve.

What is the reason for Christ or God's visit to Earth? So, we become like God but not God or become the perfect creature in Jesus Christ.

Why the world conned to thinks everything has been discovered and nothing new is coming up. It is a false perception and belief. God always works with one person if you have an idea, most likely is from the Holy Spirit if you do not give it away or make use, the Spirit ends up giving it to someone else. God is not a dictator. He does not have to be He owns the universe. If He asks you to do something, it will be an invitation. If you do not do it, He gives it to someone else. He does not have to force you to do it.

I wrote a meditation book on techniques to heal the body and be creative. That does not mean you do not need or see a doctor. If you then met God after death and asked him why you did not heal me? He will simply say, I send you a doctor. So, do not be fooled; God can heal you by anything.

Chapter 7

Suffering and spreading the truth, discovering the truth, and living in an injustice world

When God chooses someone to spread His word, then there is suffering. But a suffering God can understand our suffering. Jesus suffered physically and emotionally, and He understands our human suffering and can help when we put our sufferings on Jesus. I cannot cover all human suffering in history, but I will pick and choose certain people for the sake of revealing why this strengthen God's people and keep spreading the truth.

First: God chooses the Jews and the Arab and carries Abraham's genes to be His people.

Genesis 15:1-5 [New International Version](#)

1After these events, the word of the LORD came to Abram in a vision:

“Do not be afraid, Abram.

I am your shield,

your very great reward.”

2But Abram replied, "O Lord GOD, what can You give me since I remain childless, and the heir of my house is Eliezer of Damascus?" **3**Abram continued, “Behold, you have given me no offspring, so a servant in my household will be my heir.”

4Then the word of the LORD came to Abram, saying, “This one will not be your heir, but one who comes from your own body will be your heir.” **5**And, the LORD took him outside and said, “Now look to the heavens and count the stars, if you are able.” Then He told him, “So shall your offspring be.”

Now, Abram's wife Sarai had borne him no children, but she had an Egyptian maidservant named Hagar. His wife, Sarai, took her Egyptian maidservant Hagar and gave her to Abram to be his wife.

Genesis 17:19-21 [New International Version](#)

19But, God replied, "Your wife Sarah will indeed bear you a son, and you are to name him Isaac. I will establish My covenant with him as an everlasting covenant for his descendants after him. **20**As for Ishmael, I have heard you, and I will surely bless him; I will make him fruitful and

multiply him greatly. He will become the father of twelve rulers, and I will make him into a great nation. 21But I will establish My covenant with Isaac, whom Sarah will bear to you at this time next year.”

So, God made His choice. Theologically God can choose anybody to be His people. But He must choose someone to give His word; that is how God works. We cannot argue His will. And the suffering starts because of acting on God’s will and spread the truth.

In the old testament, the Jews suffered from being slaves in Egypt and wandering 40 years in the desert, exiled by the Babylonians and other wars they won. They demonstrated the God they worship is the only true God, and consequently, all the Prophets suffered.

After the first coming of Christ, they suffered wars with the Romans and Masada's famous battle. The Arabs called the nomad, and Bedouins lived in peace with the Jews during the old testament time; some had the Jewish religion and others were pagan. When Mohamed came, the pagan nomad and Bedouins were converted to Islam and believed in the only God. Again, the suffering began for the Arabs, and they had

wars trying to spread Islam's truth. Then they surfed the crusades was from the Christian. And finally, the Arabs suffered under the Ottoman Empire occupancy for 400 years, and they were brutal and oppressor’s Arab supremacy within Islam. In the Turks' early conquest, closed schools, only Turkish schools were established, hospitals only Turkish bath were established, burned libraries, and converted some Churches to Mosques. They did not believe in advancing knowledge or science, just astronomy, and architecture. The Arabs before the Ottomans occupancy have already excelled in science, medicine, mathematics, astronomy, poetry, Arabic arts, calligraphy, carpets, medicine, hospitals, and architecture and helped Europe come out of the medieval time with the superstitions believe. It is called the Islamic golden age. The Turks only used Arab discoveries. It is a history lesson inhumanity of the consequence of not believing in science. It put the Arab world hundreds of years behind and stopped the scientific progress, and most of their scientific journals were burned with the libraries. Most Arabs despise the Ottomans since they believe they were oppressed. The Ottomans stopped their development; also, Arab nationalism is very big, so naturally, they dislike it.

During that time, the bubonic plague hit Europe, and they persecuted the Jews, blaming them for the epidemic. Then Martin Luther came again persecuted the Jews for not converting to Christianity. Well, history repeated itself in 2020, the coronavirus pandemic happened, and the blaming game was on the rise, convincing people to start wars. At the start, Trump called it a hoax manufactured by his political opponent and started to blame them.

Finally, in WWII, the Nazis, The Holocaust. They killed millions of Jews. In 1948, the Jews from all over the world moved back to their hometown Israel. It was not done right and caused conflicts with the Arabs, their brothers.

Currently, there is still unrest with terrorists and extremists such as ISIS. The world is waiting for their everlasting peace of Jews and Arabs. The reality is Jews, Islam, and Christians are here to stay because the wars and persecutions in the past have not destroyed them for spreading the truth.

Second: Christian suffering:

Ever since Christ asked his disciples to spread the Christian Truth, there was suffering. All the apostles (past and present) and Christians suffered throughout history. The early

Christians were severely persecuted. They were given to the lions to eat, burn them in boiling water, and throw them in fire and crucifixions. After 400 years of suffering from the Romans, where the Christians were praying in secrets, the Constantine Empire adopted the Christian religion after Constantine won his war using believing in Jesus's help. A unified church was born, and the prosecution stopped at that time. Three hundred years later, Islam came, and they imposed converting Christians to Islam. Egypt was 100% Christian Coptic became 90% Muslim. Three hundred years later, there was a Chism because Rome did not send soldiers to defend the Christians in Turkey. A war against the Arabs. Turkey became Muslim, and the eastern Christians separated themselves from Rome. They believed Rome did that on purpose and did not function as one Christian Church. That takes to the Plague in Europe and the weakness of the Catholic Church to help the people. They made anybody a priest and confessing because the clergy were dying. At that time, it was 90% farmers, 5% Church, and 5% Lords. People realized something is not right, and the Church needs to be reformed. So, the Christian truth has been altered, and Martin Luther had to straighten these false beliefs and posted

his theses. On October 31, 1517, Luther wrote to his bishop, Albrecht von Brandenburg, protesting the sale of indulgences. In his letter, he enclosed a copy of his "Disputation of Martin Luther on the Power and Efficacy of Indulgences," which came to be known as the *Ninety-five Theses*.

Hans Hillerbrand writes that Luther had no intention of confronting the Church but saw his disputation as a scholarly objection to church practices. The tone of the writing is accordingly "searching, rather than doctrinaire." The advent of the printing press facilitated Luther's doctrine to spread in Europe. The Indulgence started in the crusade war before Luther, where the Pope promised the soldiers would go to Heaven if they die for freeing Jerusalem from the Muslims. These indulgences turned into money to build St Peter Church at the time of Martin Luther. Suffering started with the Christians with the Catholic Inquisition persecuting the reformation. And here we are, a divided Church: Catholic, Orthodox, and Protestants. What causes this division is the devil imposing greed.

Third: African Black people were chosen to be the root genes of humanity.

Adam and Eve were black. I had a vision when I was 12 years old in Egypt at home, and I saw Adam and Eve, and they were black. It was contrary to most art depicting Adam and Eve to be white. Like the painting of Michelangelo in front of this book, God and Adam are white. See the following reference on the original genes of humanity. <https://www.sciencemag.org/news/2017/10/new-gene-variants-reveal-evolution-human-skin-color>

“Until recently, researchers assumed that after human ancestors shed most body hair, sometime before 2 million years¹⁰ ago, they quickly evolved dark skin for protection from skin cancer and other harmful effects of U.V. radiation. Then, when humans migrated out of Africa and headed to the far north, they evolved lighter skin to adapt to limited sunlight. ([Pale skin synthesizes more vitamin D when light is](#)

¹⁰ is a mystery because creation time is different from the natural time also, we do not know when the first communication between God and humans and humans started to pray. It was the advent of Adam and Eve.

scarce.) The most dramatic discovery concerned a gene known as *MFSD12*. Two mutations that decreased this gene expression were found in high frequencies in people with the darkest skin. These variants arose about a half-million years ago, suggesting that human ancestors before that time may have had moderately dark skin, rather than the deep black hue created today by these mutations.”

It is embarrassing to be prejudiced against black and call them not human beings when our forefathers were black. It is a fact, and people should respect blacks. We all came from a black family.

Contrary to what white people think and who portrayed Jesus to be white, God loves black skin, and it was his first choice and expelled Adam and Eve to Africa from the Garden of Eden when their genes were changed, and God put the spell of death upon them. The location of Eden is described in the Book of Genesis as the source of four tributaries. Among scholars who consider it to have been real, there have been various suggestions for its location: at the head of the Persian Gulf, in southern Mesopotamia (now Iraq) where the Tigris and Euphrates rivers run into the sea; and in Armenia.

Logically, God would choose hotter weather for Adam and Eve’s naked bodies and select a more barren area for their punishment to compare to the beautiful Garden they were in.

Now, Jesus' mother was a Jew, and His father is God, and He would have him blend with the Jews. And there no verse in the Bible that says Jesus resembles gentiles. His skin is neither black nor white. Also, God loves all His creation and would not take favoritism on His Son's skin color. So why are some people prejudice against skin color? As a result of this prejudice against black skin color, they were taken as slaves and called Negros. So, they suffered throughout history. Even in the old testament, they were sold to rich people, lords, and kings in an auction. African Black Americans suffered for at least 400 years. But the problem was going on for thousands of years. It is against humanity. In Timothy, we read:

Since everything God created is good, we should not reject any of it. We may receive it gladly, with thankful hearts. (1 Timothy 4:4)

After Christ, authentic Christians were against slavery. This Bible verse tells us to love all creation, including Asians,

Black, and every creation. Every child is born or yet to be born, born in the image of God, and we are to love God's creation. So, why people do not follow Christ's message is mind-boggling. This Bible verse was not only intended for Christians only but all who believe in God.

Britain abolished slavery throughout its empire by the Slavery Abolition Act 1833 (with India's notable exception). The French colonies re-abolished it in 1848, and the U.S. abolished slavery in 1865 with the 13th Amendment to the U.S. Constitution. People should be ashamed; it took that long to wake up. After that, systematic racism was going on. On May 25, 2020, the world reacted to killing a black man unjustly in the U.S. name George Floyd in Minnesota by police, and the world raises the flag "Black Lives Matter" in solidarity. And protesters march in every state in the U.S. and across the globe. Thank you to the media and the internet; this media is the pride of the 21st Century; the whole world witnessed the execution video of George Floyd by three police officers, one kneeling on George's neck. While George was shouting, I cannot breathe for 8 minutes and 46 seconds. Trump accused the protesters of doing the black lives matter protest to attack him personally. They also tried

to alter the facts in history about the confederated flag and the confederates. To Trump, history is also fake news and can be manipulated. Hopefully, this awakening and the seed of Black Lives Matter have fallen in on the fertile ground and abolish systematic racism in the world. Just a note on God's punishment to humanity, it is possible with Christian meditation that the genes will change, and a longer life may happen. With God, all things are possible.

Fourth: The American Indians and suicide rate. God chose them for being hospitable and peaceful people.

I took a class in my undergraduate school at the University of Washington about American Indians. I was surprised that they were peaceful and hospitable, contrary to Hollywood's portrayal in western movies. Hollywood did these movies to make money. The American Indians were in touch with the Spirit of God, called it the Great Spirit, and committed to Earth's natural environment way of life. I grew in Egypt watching these movies. I always played with my brother a game called Cowboys and Indians. He would be the Cowboy, and I would be an Indian, and he would shoot me from the side of the bed or the corner of the door. I was

wrong about Indians. I became in full agreement with actor Marlo Brando's position on Hollywood movies when it was announced to receive an Oscar award; he was called to obtain it and decline to take it. It was racist, and they gave up their land by force and lived-in reservations. When I was a South Seattle Community College student learning English (ESL), we took field trips to many places. I remember a field trip to an Indian Reservation where we were fed salmon. I think the list of injustices does not end. Recently, with the coronavirus pandemic, Trump was not helping the reservations, and I heard on the news they were sending them body bags instead of testing the virus. The American Indians do not have the same resources as the rest of the country to fight the virus. It is upsetting; how ungrateful can you be? We are all people, and the virus does not know democrats from republicans from American Indians. We all got sick and need help. I took a psychology class about suicide and learned that Indian reservations have a high rate of suicide due to living standards, health care, economic disparity, education, and housings. We cannot turn our backs on this and say they are a sovereign nation and say it is their problem. It seems like we were doing the same thing when

we infected them with white man diseases, and they have a lack of an immune system to overcome the diseases. It was said time and time noted in all news media we are all in this together.

On July 4, 2020, President Trump held a rally at Mount Rushmore: Controversy, fireworks, and personal fascination. But the visit also came as the nation in recent weeks faced a new reckoning of monuments around the country seen by many as symbols of racism and oppression, rather than freedom and greatness, and has raised both public health and environmental concerns. Trump leaned into his criticism Friday night to condemn those calling to remove controversial monuments throughout the country.

While many view the Mount Rushmore monument with awe and national pride, others such as Nick Tilsen, a member of the Oglala Lakota tribe and the president of a local activist organization called NDN Collective, see it as an insulting reminder of how the land in the South Dakota's Black Hills was stolen from Native Americans because of Gold, part of a long history of their being mistreated. Trump did not have permission from the tribe to hold this rally, and he was

trespassing. But he did not care; he never had empathy. He thinks he is God, and every land in the U.S. is for him.

More on Trump:

God told me in my meditation on July 7, 2020, Trump has hurt many people by saying, “you are fired,” and being a victimizer. He is not going to win with Me. Later, He told me Trump abused the Spirit of business. It is not about hiring and firing; it is about a wholesome relationship of people working together in the ups and downs. When you frequently hire and fire, it is a sign of greed. On the news July 6, 2020, on MSNBC at 6:00 pm Pacific Time, Rachel Maddow said Trump would suffer eternally in hell for separating 5400 children from their parents and putting them in cages, mistreatment, and incarceration, all that because they were in the U.S. illegally. God is not blind. And God does not look at only four years of Trump's presidency. He looks at the whole life of the person.

Trump's niece Mary L. Trump is a Ph.D. well trained Clinical Psychologist who wrote about Trump and his father in her book. The book's title is “Too Much and Never

Enough: How My Family Created the World's Most Dangerous Man,” She said, “cheating and lying as a way of life.” Paints Trump as a ‘narcissist’ who is ‘lost to his delusional spin. On July 17, 2020, Mary commented on CNN at 6:00 pm P.T. She said she did not write the book about Trump as an act of revenge or vendetta. But because of the coronavirus and racial inequality, Trump cannot fix the problem because it means he would have to admit he made a mistake. She said Trump comes from a dysfunctional family and never had to face the real world. She also said Trump is deeply psychologically damaged, and it will worsen because he does not have treatment. Mary finally said Trump needs to resign. The news interview, Chris Cuomo, concluded Trump is a demigod and a bigot.

Commentary by psychiatrist Dr. Lance Dodes¹¹ on MSNBC on July 7, 2020, at 7:10 pm Pacific time said: Trump is a true sociopath, or in a common language, he is evil. On July 16 at 7:30 pm on MSNBC, Dr. Dodes said Trump exercise satanism, in which Trump has pleasure from other people

¹¹ Retired as an assistant clinical professor of psychiatry at Harvard Medical School.

sufferings and do not care how many people die from the coronavirus and called him a psychopath. And so, we finally heard from the professionals, and they confirm why the U.S. is in so much trouble and why God must act. The expert said back in March, the pandemic will have a worse effect on the U.S. than WWII, from the MSNBC News 3:20 pm P.T.

Final Words

I am a Christian, and that suits me well! And I have done my job as an Apostle, a Structural, Electrical, and Foundation Engineer, musician, and a certified counselor, Meditation specialist in pointing out these findings in this book.

The closest picture of Jesus appeared to me in the first apparition when I was seven years old, shortly After 1st Communion. It was an apparition meaning it comes from a different dimension other than our three dimensions. As stated in String Theory or Loop Quantum Gravity of higher dimensions

and the shroud of Turin was shown in our dimensions. On December 16, 1988, the second apparition was around 4:00 pm. It was five angels dressed in white singing and playing electric guitars (that had no electric cords) and mandolin; they were singing a Christmas song saying all the descriptions of Jesus. I was in a different dimension, driving my car that is usually a busy street with cars that cars were not there.

I saw the shroud of Turin and Jesus

John 18:36 New International Version (NIV)

³⁶ Jesus said, “My kingdom is not of this world. If it were, my servants would fight to prevent my arrest by the Jewish leaders. But now my kingdom is from another place.”

John 8:23 New International Version (NIV)

²³ But he continued, “You are from below; I am from above. You are of this world; I am not of this world.

"Let all the angels of God worship Him!" - Heavenly fanfare for Christ ascended

The five angels I saw were dressed in white and had no wings

When I had the vision in 1973, I was 22 years old, where Jesus was transfigured in my school Melkite Church in Egypt; it was around Easter time then I wrote afterward my first church song, "Jesus Christ I love you so."

In conclusion, I hope my experience with the divine becomes your experience and enlightens the way to the truth, whatever it may be science, medicine, art, theology, philosophy, etc. Knowing this universe is like a plant; it starts in the seed and continues to grow, and we smell the expected flowers and enjoy every moment it grows along the way. So, let the discoveries continue until we receive all the universe's dimensions and have the new body upon the second coming of Christ. Keep the universe in harmony and never cause instabilities in the name of the Father, Son, and Holy Spirit.
